Fractions And Open Ended Tasks:

Mine the Gap for Mathematical Understanding, Grades 3-5 John SanGiovanni, 2016-09-16 Being an effective math educator is one part based on the quality of the tasks we give one part how we diagnose what we see and one part what we do with what we find Yet with so many students and big concepts to cover it can be hard to slow down enough to look for those moments when students responses tell us what we need to know about next best steps In this remarkable book John SanGiovanni helps us value our students misconceptions and incomplete understandings as much as their correct ones because it s the gap in their understanding today that holds the secrets to planning tomorrow s best teaching SanGiovanni lays out 180 high quality tasks aligned to the standards and big ideas of Grades 3 5 mathematics including addition and subtraction of multi digit whole numbers multiplication and division of single and multi digit whole numbers foundational fraction concepts foundational decimal concepts and operations with fractions and decimals The tasks are all downloadable so you can use or modify them for instruction and assessment Each big idea offers a starting task followed by what makes it a high quality task what you might anticipate before students work with the task 4 student examples of the completed task showcasing a distinct gap commentary on what precisely counts for mathematical understanding and the next instructional steps commentary on the misconception or incomplete understanding so you learn why the student veered off course three additional tasks aligned to the mathematics topic and ideas about what students might do with these additional tasks It s time to break our habit of rushing into re teaching for correctness and instead get curious about the space between right and wrong answers Mine the Gap for Mathematical Understanding is a book you will return to again and again to get better at selecting tasks that will uncover students reasoning better at discerning the quality and clarity of students understanding and better at planning teaching based on the gaps you see Children's Reasoning While Building Fraction Ideas Carolyn A. Maher, Dina Yankelewitz, 2017-06-10 This book may be used for research graduate and undergraduate teacher education and teacher development It presents an integrated set of studies of a heterogeneously grouped class of twenty one nine year olds engaged in exploring fraction ideas prior to classroom instruction under conditions that supported investigation collaboration and argumentation It demonstrates with text and video narrative how young children can reason about mathematics in surprisingly sophisticated ways when provided the opportunity to do so in the proper classroom environment In this volume fourth grade students reasoning about fraction concepts is described through careful analysis and accompanying video excerpts showcasing the variety and originality of their thinking These children will serve as an inspiration for educators to encourage the development of reasoning and argumentation in their students as part of a mathematics curriculum designed to produce critical thinkers Open-ended Maths Tasks Helen Macpherson, 1993 A teacher s resource book for junior and middle primary teachers designed for active learning through enjoyable participation Contains over 300 student oriented tasks in number space and measurement which allow for a variety of student abilities Includes an assessment and evaluation

section and an index **Decimals and Fractions** Cynthia Mitchell,1998-04 Ready to use activities games and reproducibles that will make teaching and learning about fractions and decimals fun for everyone Students can visit the Mysterious Fraction Zone to learn about equivalent fractions play Shout It Out to practice adding and subtracting fractions and review place value by solving a puzzle Packed with creative and fun teaching ideas plus assessment tips Geared to the NCTM Standards For use with Grades 4-8 *Developing 21st Century Competencies In The Mathematics Classroom: Yearbook 2016, Association Of Mathematics Educators* Pee Choon Toh,Berinderjeet Kaur,2016-05-20 The aim of this book is to contribute towards literature in the field of mathematics education specifically the development of 21st century competencies amongst learners of mathematics The book comprising fourteen chapters written by renowned researchers in mathematics education provides readers with approaches and applicable classroom strategies to foster skills and dispositions that will enable learners to thrive in the fast changing and complex world that we live in today The chapters in the book can be classified into three broad themes The first is an examination of what is meant by 21st century competencies and how they can be developed within the context of the mathematics curriculum The second is an in depth discussion of evidence based practices aimed at fostering specific competencies like metacognition and reflective thinking critical thinking and communication skills The last and third theme is about teaching approaches that are likely to feature increasingly in the 21st century classroom for example flipped learning or the use of comics and storytelling Handbook of Research on Critical Thinking Strategies in Pre-Service Learning Environments Mariano, Gina J.,Figliano, Fred J.,2019-01-25 Learning strategies for critical thinking are a vital part of today's curriculum as students have few additional opportunities to learn these skills outside of school environments Therefore it is of utmost importance for pre service teachers to learn how to infuse critical thinking skill development in every academic subject to assist future students in developing these skills The Handbook of Research on Critical Thinking Strategies in Pre Service Learning Environments is a collection of innovative research on the methods and applications of critical thinking that highlights ways to effectively use critical thinking strategies and implement critical thinking skill development into courses While highlighting topics including deep learning metacognition and discourse analysis this book is ideally designed for educators academicians researchers and students **My Kids Can't Write, K-5** Paul Emerich France,2025-03-04 Practical and sustainable writing practice in every classroom Teachers consistently grapple with how to make writing fun and engaging While long form writing has its value research shows that balancing genre based units with frequent on demand writing tasks to help children communicate effectively and reflect on their learning might be the key to success My Kids Can't Write provides sustainable and scalable practices for writing across all content areas and shows teachers how to develop structures and rituals for sustaining a journal based approach to instruction and assessment in classrooms Inside you'll find Scaffolds and strategies that systematically support students in strengthening their skills while simultaneously writing to learn Ways to embed foundational skills like spelling and grammar to help students become

stronger communicators The purpose of cognitive writing and how to properly set up journaling within the classroom Numerous student journal samples and informative vignettes Now is the time to embed writing into all subjects and emphasize accurately interpreting information effectively communicating needs and making learning visible to students and educators alike

Essential Primary Mathematics Caroline Rickard, 2013-05-16 If you are teaching or learning to teach primary mathematics this is the toolkit to support you Not only does it cover the essential knowledge and understanding that you and your pupils need to know it also offers 176 great ideas for teaching primary mathematics adaptable for use within different areas of mathematics and for different ages and abilities Tackling children's misconceptions in each topic area and differentiation through open ended tasks and elements of choice the book encourages you to think deeply about the teaching of the primary mathematics curriculum The classroom activities which are simple to resource and use support you in meeting the Teachers Standards securely and encourage children to Think deeply about mathematics and to challenge themselves Develop mathematical independence Engage in mathematical talk Work collaboratively with others to further understanding Whether you are just getting started in your teaching career or more experienced you will find a wealth of innovative activities to support you in teaching primary mathematics in effective and creative ways This book is an absolute must for every primary teacher The perfect blend of subject knowledge common misconceptions pupil activities and self assessment questions will support all those who are feeling slightly less than confident about teaching a mathematical topic Sue Davis Primary PGCE Course Leader and Lecturer in Mathematics Education University of Leicester UK This book has the conversational style of an excellent mentor and or tutor of primary mathematics It offers advice and guidance on how to be an effective teacher of mathematics whilst still drawing the reader's attention to the importance of developing good subject knowledge and how this can be addressed This is an all encompassing text for any student or teacher of mathematics and will feature on my highly recommended reading list Paula Stone Senior Lecturer Primary Education Mathematics Canterbury Christ Church University UK This book is ideal for student and practicing teachers alike This book stands out from other texts I have used as there is an extremely helpful section at the end of each chapter which provides suggested classroom activities with associated learning objectives for each area of mathematics As a final year student I only wish this book had been available to me at the beginning of my course Shelley Rogers Student Teacher University of Chichester UK This book approaches the teaching of primary mathematics with a clear ethos which is explained in the first chapter and then pervades all the suggestions and discussions which follow The author's experience of having taught and observed hundreds of mathematics lessons is distilled into the essence of primary mathematics teaching Dr Marcus Witt Senior Lecturer in Primary and Early Years Mathematics Education University of the West of England UK
