**2012 GCSE English results** Great Britain: Parliament: House of Commons: Education Committee, 2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The problems with GCSE English can be traced back to the 2007/09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do

**Grading for Equity** Joe Feldman, 2023-08-26 For some time traditional A-F grading practices have been under fire from a wide range of stakeholder Grading policies are wildly inconsistent from classroom to classroom frequently misguided uninformed and frequently based on subjective judgments Of even more concern our grading practices exacerbate the achievement gap It is well documented that African American and Latino students boys as well as special education students are disproportionately suspended and expelled influenced by teachers unconscious but biased judgments of student behavior Virtually ignored is how teachers incorporate subjective and non academic criteria into their grades through criteria such as student attitude participation and effort and how approach to grading contributes to these same students disproportionately high course failure rates and disproportionately low placement in advanced academic tracks
