

Honeywell AM-250 Barometric Altimeter

A new generation of low-cost altitude indicating products makes RVSM affordable for a broad range of aircraft.

The AM-250 is available in pilot or crew.

The AM-250 integrates Honeywell's silicon pressure sensor and outstanding product support with the successful line of indicator products produced by its alliance partner, AMESSE Aerospace. The best of today's cost-effective technology is now available for a broad range of business jet and general aviation aircraft.

The AM-250 is a cost-effective solution for RVSM's dual altimetry system requirements on new and retrofitted light jets, such as the LearJet 750 and Challenger.

The AM-250 Barometric Altimeter is an analog measuring product which incorporates Honeywell's highly accurate silicon pressure sensor, is a Reduced Vertical Separation Minimum (RVSM) capable.

In addition to full analog and digital displays, the altimeter has two displays to indicate barometric offset in hectopascals or inches/mmeters of Hg. A rotary encoder and push button switch allow the entry of barometric offset and auto barometric set. The altimeter is internally lit to provide optimal viewing.

Jason Nicholas Moore,2023-09-17 Long ranged maritime reconnaissance aircraft were a part of British wartime strategy since the First World War in the form of flying boats During the Second World War the flying boats were increasingly replaced by land based aircraft such as the American Lend Lease Flying Fortresses and Liberators After the war these aircraft were replaced by a purpose built aircraft the Avro Shackleton which traced its ancestry through the Lincoln and Lancaster all the way back to the early Second World War bomber the Manchester The road from the Manchester to the Shackleton was a long one and it is described comprehensively The Shackleton itself went through two major changes from the MR 1 to the MR 2 then from the MR 2 to the MR 3 Along with a detailed technical description of the Shackleton and its weaponry photographs and accurate colour profiles accompany the text to illustrate the Shackleton This aircraft is compared and contrasted with its post war piston engined counterparts Its former use with the United Kingdom and South Africa is also described The current survivors especially an MR 2 WR963 in the United Kingdom and an AEW 2 WL790 in the United States are described in great detail
