**The Rise of Cable Programming in the United States** Megan Mullen, 2009-06-23 Winner McGannon Communications Research Award 2004 In 1971 the Sloan Commission on Cable Communications likened the ongoing developments in cable television to the first uses of movable type and the invention of the telephone Cable s proponents in the late 1960s and early 1970s hoped it would eventually remedy all the perceived ills of broadcast television including lowest common denominator programming inability to serve the needs of local audiences and failure to recognize the needs of cultural minorities Yet a quarter century after the blue sky era cable television programming closely resembled and indeed depended upon broadcast

television programming Whatever happened to the Sloan Commission's revolution now in sight In this book Megan Mullen examines the first half century of cable television to understand why cable never achieved its promise as a radically different means of communication Using textual analysis and oral archival and regulatory history she chronicles and analyzes cable programming developments in the United States during three critical stages of the medium's history the early community antenna CATV years 1948 1967 the optimistic blue sky years 1968 1975 and the early satellite years 1976 1995 This history clearly reveals how cable's roots as a retransmitter of broadcast signals the regulatory constraints that stymied innovation and the economic success of cable as an outlet for broadcast or broadcast type programs all combined to defeat most utopian visions for cable programming

**Needy Media** Stephen Monteiro, 2025-10-16 What makes our portable networked personal media devices smartphones tablets smartwatches so irresistible Reacting to our touch voice or gaze seizing and keeping our attention with sounds vibrations and screen prompts these objects construct an animated intimacy that builds trust and emotional dependence Needy Media explores how features such as face recognition awareness sensors and touchscreens have developed and intersected tying them to key concepts of psychology language and the body Surveying products and practices across a half century Stephen Monteiro argues that the appeal is as much about how media devices behave as it is about the information they convey Monteiro traces a symbiotic overreliance a neediness between users and devices fostered by personalized aspects of digital materiality The physical and emotional bonds that emerge he argues not only cast our devices as loyal companions adaptable to our needs and idiosyncrasies they also facilitate the corporate harvesting of massive amounts of personal data in the name of making technology more friendly intuitive and individualized Raising important questions about privacy and power Needy Media seeks answers in the complex and sensitive relationship between interface and body a coupling that makes the networked object both an essential psychological presence and a lingering concern for our sense of self
