all activities working with leather and making your own accessories which otherwise would set you back hundreds of dollars if you went and bought them off the shelves Believe me if you are under the impression that working with leather is very difficult it is definitely not so If you have pushed a needle and thread through a piece of fabric you can consider leather to be just another fabric It may be a bit harder to work on but if the thread has been asked with ordinary candle wax and your needle is sharp there is absolutely no problem in stitching leather and absolutely no limits to the things you can make out of leather People have been doing so for millenniums from jewelry to pouches to bags to moccasins and shoes to anything you want to make which is going to be long lasting and a thing to treasure So let us assemble our equipment first There are plenty of leather making kits on the Internet but with their totally absurd prices of up to 225 surely surely you are not going to waste all your money on buying such a case or kit unless of course you want to become a traditional leather worker and intend to sell the things you make Leather is normally made from the skin of animals The whole skin is sold and the portion of the back is stronger and thicker than the one at the edges That is why when you begin cutting shapes in leather you would want to look at the thickness beforehand The easiest to work with are leathers obtained from goats and sheep Sheepskin leather this is of course the cheapest because it is so easily available and that is why many people do plenty of embroidery work upon so that it looks more expensive
