**The Road to Nowhere** Jacob S. Hacker, 2020-11-10 During the 1992 presidential campaign health care reform became a hot issue paving the way for one of the most important yet ill fated social policy initiatives in American history Bill Clinton's 1993 proposal for comprehensive coverage under managed competition Here Jacob Hacker not only investigates for the first time how managed competition became the president's reform framework but also illuminates how issues and policies emerge He follows Clinton's policy ideas from their initial formulation by policy experts through their endorsement by medical industry leaders and politicians to their inclusion in a new and unexpected form in the proposal itself Throughout he explores key questions Why did health reform become a national issue in the 1990s Why did Clinton choose managed competition over more familiar options during the 1992 presidential campaign What effect did this have on the fate of his proposal Drawing on records of the President's task force interviews with a wide range of key policy players and many other sources Hacker locates his analysis within the context of current political theories on agenda setting He concludes that Clinton chose managed competition partly because advocates inside and outside the campaign convinced him that it represented a unique middle road to health care reform This conviction Hacker maintains blinded the president and his allies to the political risks of the approach and hindered the development of an effective strategy for enacting it Federally Funded Research United States. **The Boston Contest of 1944** Jeffry M. Diefendorf, 2015-03-05 During World War II many European government authorities and planners believed that the damage caused by bombing constituted a great opportunity to transform their cities Even as the fighting continued a great many plans were drawn up and this has been the subject of much scholarship However what is often overlooked is wartime planning in cities not damaged in the war United States cities were not bombed but in Boston one of its leading

cities the last years of the war brought a major effort to encourage both new plans to modernize the city and also means of implementing those plans. The wartime initiative to transform Boston had several sources. Both the Great Depression and the war had led to major measures by the federal government to try to deal with fiscal challenges and the need for new housing for the many people who relocated during the war because of the creation of new industries to help the war effort. Boston hoped it could benefit from these measures. Moreover, in the late 1930s Harvard University had become a key residence for figures important in modernist planning including Joseph Hudnut, Walter Gropius, and Martin Wagner. These factors combined in 1944 to inspire what was called The Boston Contest. Its goal was to suggest solutions to many problems found in the metropolitan area. These issues included commercial and industrial developments, housing, transportation, education, recreation, welfare, urban finances, metropolitan government, and citizen participation in solving problems. This book, published in 1945, contains the top 3 prize-winning entries and excerpts from 9 of the other nearly 100 entries. It gives a fascinating insight into the developing ideas of urban planning in the United States at a critical juncture.

**Federally Funded Research: Decisions for a Decade**, 1991 *International Handbook of Public Procurement* Khi V. Thai, 2017-09-25 Since the 1990s government at all levels is under increasing pressure to do more with less. However, despite the U.S. government spending about 15 to 20 percent of its GDP on contracts for goods and services, there is a paucity of reference books for public procurement officials and very few textbooks for courses on the subject. Filling this void, the *International Handbook of Public Procurement* provides the knowledge necessary to understand how procurement works and how to improve the cost effectiveness of procurement systems. Taking a multidisciplinary approach, the book focuses on the managerial, economic, political, and legal aspects of this topic. It begins with a conceptual framework and highlights various reforms occurring in certain countries. By examining these improvements, readers are able to apply this knowledge to their own strategies. The next section presents selected cases that illustrate the public procurement process, examining systems in various nations including Germany, China, South Africa, Cambodia, Uganda, and Estonia. The book also discusses the rise of electronic procurement systems, e-procurement, and reviews the benefits of these efficient systems. Other topics presented in this comprehensive volume include practical discussions on contract negotiations, bidding, price strategies, and cost analysis, and an insightful chapter on the market's response to contract award announcements. A virtual encyclopedia from numerous international experts, this book was assembled by Khi V. Thai, Professor at Florida Atlantic University and Editor of the *Journal of Public Procurement*. Dr. Thai has provided technical assistance in the area of public procurement to governments across the world. Empowering those on all sides of the issue, this volume dispenses advice valuable to government officials and contractors as well as providing a comprehensive text for public administration students.

perspective This theme was raised as an effort to observe the development of new technology that has greatly affected people's lives Formerly to seek information people can get it through conventional radio media newspapers and television But now only use the smartphone we can get very much information that can be obtained by accessing the online media portal or sharing and socializing through social media For decades it has been stated that the media has the power to shape public opinion Media not only can form a worldview of society but also able to create awareness and individual belief in reality a reality that has been defined by the media Media has a powerful and direct effect to the audience market Including how then the media formed an opinion in the community about gender roles through the content provided by the new media Of course it will be interesting to study media related to the law social and economic perspective Auctioning Public Assets Maarten Christiaan Wilhelmus Janssen, 2004 In many countries all over the world governments are privatising firms that were previously under public control This is happening for example in public utility sectors such as gas water and electricity in transport sectors such as rail and metro and in radio and telephony This book provides an overview of the economic issues that are involved in this transfer of ownership of public assets Combining a theoretical framework with a set of case studies of recent sales of state owned assets from Europe and the USA it asks which sort of allocation mechanism can a government adopt Which is most suited to a particular sale And how will the choice of allocation mechanism affect future market outcomes With contributions from international experts this book offers an accessible introduction to auction theory and an invaluable non technical analysis of existing knowledge It will be of interest to students non specialists and policy makers alike **The Economic Experience** Charles A. Holt, Erica Sprott, 2025-07-29 An innovative introduction to economic behavior that uses interactive experiments to promote experience based discovery This book presents a unique active learning approach to economic thinking providing a behavioral perspective on basic economic concepts ranging from trust to trade Each chapter features a classroom experiment where students engage directly with the material as market participants and chapters come with warm up exercises quizzes and incisive summaries The Economic Experience empowers students to develop insights into essential economic principles and goes beyond merely documenting behavioral anomalies by showing students how to navigate and anticipate them through hands on learning and team building Encourages discovery of key behavioral insights with interactive class simulations Provides a Socratic structure through lab reports for interpreting and applying lessons from experiment results while interacting with fellow students Includes What Economists Do sections that highlight key applications and policy issues Covers standard topics such as gains from trade marginal analysis and the resilience of competitive markets Enables students to experience the negative effects of market imperfections related to monopoly power non price rent seeking corruption congestion and inadequate incentives for the provision of public goods Introduces notions of risk and strategic behavior in games and auctions Explains foundational macroeconomic concepts such as financial markets and the role of money while addressing behavioral issues like bank runs and asset market price bubbles
