Howard Aldrich Evolution Variation Entrepreneuriat:

Howard Aldrich - Evolution, variation, entrepreneuriat Bernard Forgues, 2009-11-01 L'immense contribution d'Howard Aldrich à la théorie des organisations révèle à la fois une vision et une cohérence rares. Pionnier de l'approche de l'organisation comme système ouvert, voir Aldrich 1971, il a ouvert la voie à la sociologie des populations, théorie de l'approche évolutionniste des organisations et donné l'impulsion à une nouvelle branche de l'entrepreneuriat. En fait, ses nombreux apports s'inscrivent dans la même ligne. Ils constituent des avancées successives inscrites dans le même cadre théorique ayant guidé les recherches d'Howard Aldrich depuis plus de trente ans. L'évolution des organisations. C'est ce cadre théorique puissant et soigneusement pensé dans le détail qui explique la remarquable cohérence des très nombreuses publications d'Aldrich. Le constat de départ est celui de l'absence de contexte dans la majeure partie des travaux sur les organisations. Cela a amené Aldrich à se consacrer aux relations entre les organisations et leurs environnements. L'environnement, tant lui-même composé d'organisations, cela conduit naturellement à se pencher sur des populations d'organisations, d'où un premier ensemble pionnier de travaux sur la sociologie des populations. Cependant, si ce cadre permet de mettre en avant des mécanismes fondamentaux comme la sélection, il est plus restrictif sur d'autres. Ainsi, la variation dans les populations d'organisations n'a fait l'objet que d'un nombre très restreint de travaux dans cette perspective. De passer ces limites nécessite d'avoir un cadre plus globalisant. Aldrich est ainsi passé d'une perspective évolutionniste, dont les mécanismes fondamentaux permettent d'étudier différents niveaux d'analyse et d'intégration d'apports de plusieurs champs disciplinaires. Ceci lui a permis d'analyser la variation, c'est-à-dire la création de nouvelles entreprises, l'entrepreneuriat. Dans la suite de ce texte, la sociologie des populations, l'évolutionnisme et l'entrepreneuriat font l'objet de trois parties successives. Dans chacune d'elles, on trouvera une rapide présentation de quelques contributions d'Aldrich et une mise en perspective.

A Research Agenda for Entrepreneurship and Context Friederike Welter, William B. Gartner, 2016-09-30 There is growing recognition that entrepreneurship can be better understood within its context. This carefully designed book invites readers to take a journey from reflecting critically on where the discussion on context and entrepreneurship stands today towards identifying future research questions and themes that deserve the attention of entrepreneurship scholars. This collection draws attention to the research challenges the entrepreneurship field faces by reviewing the many facets of contexts and by reflecting on methods and theoretical approaches that are required in order to contextualize entrepreneurship research. Students and academics interested in context and entrepreneurship will benefit from this far-reaching and forward-thinking book.

Pioneers in Entrepreneurship and Small Business Research H. Landstrom, 2007-12-31 Around the world there is an increasing interest in issues of small business and entrepreneurship. In a time with a lot of myths and opinions of the role of entrepreneurs and small business, it is vital for a book like this to encapsulate the knowledge that can be gained from the most significant research contributions in the field. Such knowledge is often built upon empirical oriented methods providing policy relevant results for small business owners and entrepreneurs.

The aim of *Pioneers in Entrepreneurship and Small Business Research* is first to provide a historical doctrinal review of the development of entrepreneurship and small business research and second to present some of the key pioneers that have shaped the research field during the past three decades. The book focuses on the first recipients of the FSF NUTEK International Award for Small Business Research including David Birch, Arnold Cooper, David Storey, Ian MacMillan, Howard Aldrich, Zoltan Acs, David Audretsch, and Giacomo Becattini.

De Gruyter Handbook of Sociology of Innovation and Entrepreneurship Olav Sorenson, Patricia H. Thornton, 2025-04-21. The number of organization theorists and sociologists studying innovation and entrepreneurship has grown rapidly over the past two decades yet it has been roughly 15 years since any volume has attempted a comprehensive review of the state of the literature. In addition to having grown rapidly, the sociological literatures on entrepreneurship and innovation have evolved relatively independently. However, there are intellectual synergies to be gained in connecting these two literatures. A large share of innovation happens in the context of startups, and a large share of startups pursue innovation through the commercialization of products and services. Featuring engaging contributions from leading scholars in the field, the *De Gruyter Handbook of Sociology of Innovation and Entrepreneurship* is a must-have and up-to-date summary of the literatures on the sociology of entrepreneurship and innovation. It is a comprehensive reference work highlighting emerging areas and cutting-edge research while also providing a vibrant agenda that empowers scholars and students to generate new ideas and knowledge.

Handbook on Organisational Entrepreneurship Daniel Hjorth, 2012-01-01. Daniel Hjorth is justifiably famous for thinking differently about those things we all know, and this Handbook adds fuel to that fire. The Handbook reasserts the intellectual and practical primacy of organizational creation as the driving force of entrepreneurship. By getting some of the best minds in entrepreneurship to explore and speculate on the organizational aspects of entrepreneurship, this Handbook reframes and repositions entrepreneurship as the organizing trope for the postindustrial age. Jerome Katz, Saint Louis University, US. This Handbook brings together pioneering original work on organisational entrepreneurship. It provides a broad coverage and rich agenda for future research and teaching on the entrepreneurship-organisation relationship. Organisational entrepreneurship represents an interdisciplinary field of research that relates organisation, entrepreneurship, and innovation studies in new ways. This Handbook establishes the scope of this interdisciplinary domain, challenges our perception of relationships between organisations and entrepreneurship, and asks new questions central to our capacity to describe, analyse, and understand organisational entrepreneurship. Providing a broad and rich set of examples of interdisciplinary research and bridging the fields of strategic management, organisation studies, entrepreneurship, innovation, art, and aesthetics, this important compendium will prove invaluable to graduate students and scholars in these fields.

Entrepreneurship as Networking Tom Elfring, Kim Klyver, Elco van Burg, 2021 In the world of business who you know is usually more important than what you know While most research highlights the personal characteristics and expertise important to business success this book demonstrates that networking is the core of entrepreneurship Both counterintuitive and powerful this perspective reframes entrepreneurial action by placing networking at the center of the process Traditionally networks have been regarded as facilitators of business but Tom Elfring Kim Klyver and Elco van Burg argue that networking is actually the basis of entrepreneurial action and conversely that entrepreneurial action is networking In developing an entrepreneurship as

networking model the book addresses the persistent problems that plague the dominant individual opportunity approach in entrepreneurship They describe the key dynamics mechanisms and practices of entrepreneurship as networking and point at fruitful networking strategies for entrepreneurs Thus the authors provide an integrated and dynamic account of entrepreneurial agency that prioritizes interaction with the surrounding social environment They also explain what a viable network is for entrepreneurs and how networking activities affect their endeavours Their perspective sheds new light on the origins of opportunities and how entrepreneurs access and mobilize resources The approach also explains how entrepreneurs build legitimacy and exploit the networks they work within Offering a groundbreaking theory of entrepreneurial action as networking Entrepreneurship as Networking opens up an entirely new research agenda Canada and the New World Economic Order Thomas James Wesson,2007 Business Modeling for Life Science and Biotech Companies Alberto Onetti,Antonella Zucchella,2014-03-21 Most books on the biotechnology industry focus on scientific and technological challenges ignoring the entrepreneurial and managerial complexities faced bio entrepreneurs The Business Models for Life Science Firms aims to fill this gap by offering managers in this rapid growth industry the tools needed to design and implement an effective business model customized for the unique needs of research intensive organizations Onetti and Zucchella begin by unpacking the often used business model term examining key elements of business model conceptualization and offering a three tier approach with a clear separation between the business model and strategy focus exploring the different activities carried out by the organization locus evaluating where organizational activities are centered and modus testing the execution of the organization s activities The business model thus defines the unique way in which a company delivers on its promise to its customers The theory and applications adopt a global approach offering business cases from a variety of biotech companies around the world **Entrepreneurialism and Society** Robert N. Eberhart,Michael Lounsbury,Howard E. Aldrich,2022-09-22 Entrepreneurialism and Society invigorates academic research by developing new perspectives on how entrepreneurs and their organizations shape our social world *Variations in Organization Science* Donald Thomas Campbell,Joel A. C. Baum,Bill McKelvey,1999-05-14 In my judgment this book in honor of Donald T Campbell will be very influential and highly cited It will become a must read for Ph D students and scholars in strategy and organization theory Arie Lewin Duke University The topics in this volume are cutting edge and the contributors are first rate The book is well anchored Donald T Campbell has had a profound influence on the field Moreover the book is well conceptualized socio cultural evolution co evolution methods modeling and epistemology are key issues in organization science right now Michael Tushman Harvard University If he were an assistant professor today what would social science giant Donald T Campbell be pursuing in the field of organization science Joel A C Baum and Bill McKelvey explore this question in *Variations in Organization Science* This volume reveals and celebrates Campbell s many contributions to organization science by presenting new variations that stem directly from his work Rather than analyze Campbell s theories

the authors present ideas that Campbell might have pursued if he were currently a doctoral student This volume is unique in its focus on coevolution and multilevel coevolutionary analysis as well as in its range of subject matter from empirical studies to leading edge epistemological discourses Each of the book's four main sections focuses on a major aspect of Campbell's legacy: blind variation, selection and retention, multilevel coevolution, process, level analysis and modeling and epistemology and methodology In addition the volume includes a Foreword by Barbara Frankel Campbell and an unusual Appendix: Donald Campbell's complete curriculum vitae Variations in Organization Science should be on the top of the reading list for any organization scientist interested in organizational evolution, change and competitiveness This volume will also appeal to any scholar interested in the human and social capital base of firms and how organizational knowledge and learning work to provide the basis of competitive advantage

The Oxford Handbook of Business History Geoffrey Jones, Jonathan Zeitlin, 2008-01-25 This Handbook provides a state of the art survey of research in business history Business historians study the historical evolution of business systems, entrepreneurs and firms as well as their interaction with their political, economic and social environment They address issues of central concern to researchers in management studies and business administration as well as economics, sociology and political science and to historians They employ a range of qualitative and quantitative methodologies but all share a belief in the importance of understanding change over time The Oxford Handbook of Business History has brought together leading scholars to provide a comprehensive critical and interdisciplinary examination of business history organized into four parts: Approaches and Debates, Forms of Business Organization, Functions of Enterprise and Enterprise and Society The Handbook shows that business history is a wide ranging and dynamic area of study generating compelling empirical data which has sometimes confirmed and sometimes contested widely held views in management and the social sciences The Oxford Handbook of Business History is a key reference work for scholars and advanced students of Business History and a fascinating resource for social scientists in general

The Entrepreneurial Group Martin Ruef, 2010-07-01 Recent surveys show that more than half of American entrepreneurs share ownership in their business startups rather than going it alone Yet the media and many scholars continue to perpetuate the myth of the lone visionary who single handedly revolutionizes the marketplace In *The Entrepreneurial Group* Martin Ruef shatters this myth demonstrating that teams, not individuals, are the leading force behind entrepreneurial startups This is the first book to provide an in depth sociological analysis of entrepreneurial groups and to put forward a theoretical framework for understanding activities and outcomes within them
