

INHERIT THE WIND

State the speaker and the significance of the following quote: Your answers must be in **complete paragraph format**. (Remember: one sentence = one point)

(5 marks each)

1. The individual human mind. In a child's power to master the multiplication table there is more mystery than in all your stonied "Mosaic", "Holy Writ" and "Mosaicist". An idea is a greater monument than a cathedral. And the advance of man's knowledge is more of a miracle than any stick turned to snake, or the parting of waters!
2. Lord, we call down the same curse on those who ask grace for this sin—though they be blood of my blood, and flesh of my flesh!
3. I am trying to establish, Your Honor, that Howard—or Colonel Brady—or Charles Daniels—or anyone else in this courtroom—or you, sir—has the right to think!

On the Fringe Michael D. Gordin,2021-03-23 Everyone has heard of the term pseudoscience typically used to describe something that looks like science but is somehow false misleading or unproven Many would be able to agree on a list of things that fall under its umbrella astrology phrenology UFOlogy creationism and eugenics might come to mind But defining what makes these fields pseudo is a far more complex issue It has proved impossible to come up with a simple criterion that enables us to differentiate pseudoscience from genuine science Given the virulence of contemporary disputes over the denial of climate change and anti vaccination movements both of which display allegations of pseudoscience on all sides there is a clear need to better understand issues of scientific demarcation *On the Fringe* explores the philosophical and historical attempts to address this problem of demarcation This book argues that by understanding doctrines that are often seen as antithetical to science we can learn a great deal about how science operated in the past and does today This exploration raises several questions How does a doctrine become demonized as pseudoscientific Who has the authority to make these pronouncements How is the status of science shaped by political or cultural contexts How does pseudoscience differ from scientific fraud Michael D Gordin both answers these questions and guides readers along a bewildering array of marginalized doctrines looking at parapsychology ESP Lysenkoism scientific racism and alchemy among others to better understand the struggle to define what science is and is not and how the controversies have shifted over the centuries *On the Fringe* provides a historical tour through many of these fringe fields in order to provide tools to think deeply about scientific controversies both in the past and in our present *A Jealous God* Pamela R. Winnick,2005-10-30 A look at the personal and professional motivations behind the scientific community's dogmatic rejection of religion and how this impacts the culture The age old war between religion and science has taken a new twist Once the dedicated scientist martyr fought heroically against rigid religionists But now the tables have turned and it is established science crusading against religion pushing atheistic agendas in the classroom in textbooks and in the media This book shows how science has now become a religion of its own an often fanatical one at that furiously preaching atheism punishing dissenters dictating how and what we should think and subtly inserting its worldviews in everything from education to entertainment And with stunning clarity it proves that with billions of dollars up for grabs in the race for stem cell research intellectual integrity has been replaced with good old fashioned greed With sharp insight and completely original reporting this book defiantly shows the extent to which science is beating down religion and how this systematic tyranny is unmistakably weakening culture and society **The Best of Connie Willis** Connie Willis,2013-07-09 Few authors have had careers as successful as that of Connie Willis
