project by UNESCO's International Hydrological Programme on this topic. The volume begins by introducing the urban water cycle concept and the need for integrated or total management. It then explores in detail the manifold hydrological components of the cycle, the diverse elements of urban infrastructure and water services, and the various effects of urbanization on the environment from the atmosphere and surface waters to wetlands, soils, and groundwater, as well as biodiversity. A concluding series of recommendations for effective urban water management summarize the important findings set forth here.

Urban Water Series UNESCO IHP Volumes Following from the Sixth Phase of UNESCO's International Hydrological Programme, 2002-2007, the Urban Water Series UNESCO IHP addresses fundamental issues related to the role of water in cities and the effects of urbanization on the hydrological cycle and water resources. Focusing on the development of integrated approaches to sustainable urban water management, the Series should inform the work of urban water management practitioners, policy makers, and educators throughout the world.
