Kzn Business Studies Preparatory Exam 2014:

Psychology, Technological Innovation, and Entrepreneurship Jesus de la Fuente, Douglas F. Kauffman, Unai Diaz-Orueta, 2019-12-17 **The Infrastructures of Security** Martin Murray, 2022-08-15 Much of the South African government's response to crime especially in Johannesburg has been to rely increasingly on technology. This includes the widespread use of video cameras, Artificial Intelligence, machine learning, and automated systems effectively replacing human watchers with machine watchers. The aggregate effect of such steps is to determine who is and isn't allowed to be in public spaces essentially another way to continue segregation. In *The Infrastructures of Security* author Martin J. Murray concentrates on not only the turn toward technological solutions to managing the risk of crime through digital and software-based surveillance and automated information systems but also the introduction of somewhat bizarre and fly-by-night experimental answers to perceived risk and danger. Digitalized surveillance is significant for two reasons: first, it enables monitoring to take place across wide geographical distances with little time delay, and second, it allows for the active sorting, identification, and tracking of bodies, behaviors, and characteristics of subject populations on a continuous real-time basis. These new software-based surveillance technologies represent monitoring, tracking, and information gathering without walls, towers, or guards.
