

Bale Management

Bale Management:

It is the process of judicious selection of bales in order to achieve consistent level of quality with minimum level of price.

It is done to attain the following objectives:

1. To achieve a minimum level of cost by combining raw cotton lots of different prices.
2. To achieve a consistent level of quality by selecting bales for each laydown in such a way that the average fiber properties always stay within an acceptable range.

In factories, bale management is carried out in two ways.

1. Using Specialized software e.g. Bale Manager, BIAS (Bale Information Analysis System) etc.
2. Using general application software e.g. Excel, Access etc.

Bale Management using Specialized software

Steps:

1. **Sampling:** Upon receiving bales in the factory, samples are collected from each bale and each bale is marked according to the sample serial number. The bales are then kept in warehouse
