mathematics has proved to be a greatly underappreciated engine of human progress In this captivating sweeping history Michael Brooks acts as our guide through the ages He makes the case that mathematics was one of the foundational innovations that catapulted humanity from a nomadic existence to civilization and that it has since then been instrumental in every great leap of humankind Here are ancient Egyptian priests Babylonian bureaucrats medieval architects dueling Swiss brothers renaissance painters and an eccentric professor who invented the infrastructure of the online world Their stories clearly demonstrate that the invention of mathematics was every bit as important to the human species as was the discovery of fire From first page to last *The Art of More* brings mathematics back into the heart of what it means to be human
