Velleman, Stan Wagon, 2020-08-17 Bicycle or Unicycle is a collection of 105 mathematical puzzles whose defining characteristic is the surprise encountered in their solutions Solvers will be surprised even occasionally shocked at those solutions The problems unfold into levels of depth and generality very unusual in the types of problems seen in contests In contrast to contest problems these are problems meant to be savored many solutions all beautifully explained lead to unanswered research questions At the same time the mathematics necessary

to understand the problems and their solutions is all at the undergraduate level The puzzles will nonetheless appeal to professionals as well as to students and in fact to anyone who finds delight in an unexpected discovery These problems were selected from the Macalester College Problem of the Week archive The Macalester tradition of a weekly problem was started by Joseph Konhauser in 1968 In 1993 Stan Wagon assumed problem generating duties A previous book written by Wagon Konhauser and Dan Velleman Which Way Did the Bicycle Go gathered problems from the first twenty five years of the archive The title problem in that collection was inspired by an error in logic made by Sherlock Holmes who attempted to determine the direction of a bicycle from the tracks of its wheels Here the title problem asks whether a bicycle track can always be distinguished from a unicycle track You ll be surprised by the answer     *Recent Advances in Financial Engineering 2014* Masaaki Kijima,Yukio Muromachi,Takashi Shibata (Associate professor),2016 Since 2004 the Tokyo Metropolitan University TMU has been conducting workshops that serve as a forum for academic researchers and practitioners to exchange ideas and developments in different fields of finance This book is based on papers presented at the 2014 workshop held in Tokyo on 6 7 November 2014 The chapters address state of the art techniques in mathematical finance and financial engineering The authors share ideas and information on new methods and up to date results of their research in these fields This book is a must read for researchers practitioners and graduate students in the fields of mathematical finance quantitative finance and financial engineering Provided by publisher     **Color Image Processing** Edoardo Provenzi,2018-05-22 This book is a printed edition of the Special Issue Color Image Processing that was published in J Imaging     *Telecommunication Network Economics* Patrick Maillé,Bruno Tuffin,2014-02-27 An up to date guide to the economic issues in telecommunications delivering a comprehensive overview from mathematical models to practical applications Covering hot topics such as app stores auctions for advertisements search engine business models network neutrality and virtual network operators this resource is ideal for graduate students researchers and industry practitioners     **The Parliamentary Debates (Hansard).** Great Britain. **Deterrence: Examining the Evidence** Keith B. Payne,James Schlesinger,2016-04-14 The National Institute for Public Policy s new book Minimum Deterrence Examining the Evidence is the first of its kind Dr Keith Payne former Secretary of Defense James Schlesinger and an unparalleled bipartisan group of senior civilian and military experts critically examine eight basic assumptions of Minimum Deterrence against available evidence In general Minimum Deterrence does not fare well under the careful scrutiny Proponents of a Minimum Deterrent US nuclear force posture believe that anywhere from a handful to a few hundred nuclear weapons are adequate to deter reliably and predictably any enemy from attacking the United States now and in the future Because nuclear weapons are so destructive their thinking goes no foreign leader would dare challenge US capabilities The benefits advocates claim of reducing US nuclear weapons to the minimum level needed are better relations with Russia and China reinforcement of the arms control and Nonproliferation Treaty billions of defense dollars in savings and greater international stability on the way to nuclear zero As political pressure builds to pursue this vision of minimum US deterrence Minimum Deterrence Examining the Evidence stands as the seminal study to address the many claims of great benefit using available evidence This book was published as a special issue of Comparative Strategy     **The Lacan**

**Tradition** Lionel Bailly,David Lichtenstein,Sharmini Bailly,2018-04-09 The Lacanian Tradition is unique among psychoanalytic schools in its influence upon academic fields such as literature philosophy cultural and critical studies This book aims to make Lacan s ideas accessible and relevant also to mainstream psychoanalysts and to showcase developments in Lacanian thinking since his death in 1981 The volume highlights the clinical usefulness of such concepts as the paternal metaphor the formula of fantasy psychic structure the central role of desire and the interlinking of the individual subject in the matrix of the Other While these themes are woven through all the papers each is a highly individual reflection upon some aspect of Lacanian theory practice or history     **The Merit Myth** Anthony P. Carnevale,Peter Schmidt,Jeff

Strohl,2020-05-19 An eye opening and timely look at how colleges drive the very inequalities they are meant to remedy complete with a call and a vision for change Colleges fiercely defend America s deeply stratified higher education system arguing that the most exclusive schools reward the brightest kids who have worked hard to get there But it doesn t actually

work this way As the recent college admissions bribery scandal demonstrates social inequalities and colleges pursuit of wealth and prestige stack the deck in favor of the children of privilege For education scholar and critic Anthony P Carnevale it s clear that colleges are not the places of aspiration and equal opportunity they claim to be The Merit Myth calls out our elite colleges for what they are institutions that pay lip service to social mobility and meritocracy while offering little of either Through policies that exacerbate inequality including generously funding so called merit based aid for already wealthy students rather than expanding opportunity for those who need it most U S universities the presumed pathway to a better financial future are woefully complicit in reproducing the racial and class privilege across generations that they pretend to abhor This timely and incisive book argues for unrigging the game by dramatically reducing the weight of the SAT ACT measuring colleges by their outcomes not their inputs designing affirmative action plans that take into consideration both race and class and making 14 the new 12 guaranteeing every American a public K 14 education The Merit Myth shows the way for higher education to become the beacon of opportunity it was intended to be     Competition and Cooperation in Economics and Business Lindawati Gani,Beta Yulianita Gitaharie,Zaäfri Husodo,Ari Kuncoro,2017-10-12 Asia and the Pacific have become the growth engine of the world economy with the contribution of two third of the global growth The book discusses current issues in economics business and accounting in which economic agents as individuals entrepreneurs and professionals as well as countries in the Asia and Pacific regions compete and collaborate with each other and with the rest of the globe Areas covered in the book include economic development and sustainability labor market competition Islamic economic and business marketing finance accounting standard compliances and taxation It will help shed light on what business and economic scholars in regions have done in terms of research and knowledge development as well as the new frontiers of research that have been explored and opening up This is an Open Access ebook and can be found on [www.taylorfrancis.com](http://www.taylorfrancis.com)
