Combining a non-invasive transcranial stimulation technique with another therapeutic approach: mechanisms of action, therapeutic interest and tolerance Jean Paul Buu Cuong Nguyen, Julien Nizard, Helena Knotkova, Simone Rossi, Jean-Pascal Lefaucheur, 2024-07-23 Numerous publications have attested to the therapeutic efficacy of non invasive brain stimulation NIBS techniques such as repetitive transcranial magnetic stimulation rTMS and low intensity transcranial electrical stimulation tES These methods have been used in the treatment of various neurological related conditions such as chronic pain cognitive disorders movement disorders or stroke rehabilitation Across these different fields evidence suggests therapeutic efficacy could be improved when combining NIBS technique in combination with another type of more commonly utilized therapeutic approaches e g motor and or cognitive training pharmacological physical and neurorehabilitation

Flight Vehicle System Identification Ravindra V. Jategaonkar, 2006 This valuable volume offers a systematic approach to flight vehicle system identification and exhaustively covers the time domain methodology It addresses in detail the theoretical and practical aspects of various parameter estimation methods including those in the stochastic framework and focusing on nonlinear models cost functions optimization methods and residual analysis A pragmatic and balanced account of pros and cons in each case is provided The book also presents data gathering and model validation and covers both large scale systems and high fidelity modeling Real world problems dealing with a variety of flight vehicle applications are addressed and solutions are provided Examples encompass such problems as estimation of aerodynamics stability and control derivatives from flight data flight path reconstruction nonlinearities in control surface effectiveness stall hysteresis unstable aircraft and other critical considerations

Language and Cognition Kuniyoshi L. Sakai, Leonid Perlovsky, 2015-07-07 Interaction between language and cognition remains an unsolved scientific problem What are the differences in neural mechanisms of language and cognition Why do children acquire language by the age of six while taking a lifetime to acquire cognition What is the role of language and cognition in thinking Is abstract cognition possible without language Is language just a communication device or is it fundamental in developing thoughts Why are there no animals with human thinking but without human language Combinations even among 100 words and 100 objects multiple words can represent multiple objects exceed the number of all the particles in the Universe and it seems that no amount of experience would suffice to learn these associations How does human brain overcome this difficulty Since the 19th century we know about involvement of Broca's and Wernicke's areas in

language What new knowledge of language and cognition areas has been found with fMRI and other brain imaging methods Every year we know more about their anatomical and functional effective connectivity What can be inferred about mechanisms of their interaction and about their functions in language and cognition Why does the human brain show hemispheric i e left or right dominance for some specific linguistic and cognitive processes Is understanding of language and cognition processed in the same brain area or are there differences in language semantic and cognitive semantic brain areas Is the syntactic process related to the structure of our conceptual world Chomsky has suggested that language is separable from cognition On the opposite cognitive and construction linguistics emphasized a single mechanism of both Neither has led to a computational theory so far Evolutionary linguistics has emphasized evolution leading to a mechanism of language acquisition yet proposed approaches also lead to incomputable complexity There are some more related issues in linguistics and language education as well Which brain regions govern phonology lexicon semantics and syntax systems as well as their acquisitions What are the differences in acquisition of the first and second languages Which mechanisms of cognition are involved in reading and writing Are different writing systems affect relations between language and cognition Are there differences in language cognition interactions among different language groups such as Indo European Chinese Japanese Semitic and types different degrees of analytic isolating synthetic inflected fused agglutinative features What can be learned from sign languages Rizzolatti and Arbib have proposed that language evolved on top of earlier mirror neuron mechanism Can this proposal answer the unknown questions about language and cognition Can it explain mechanisms of language cognition interaction How does it relate to known brain areas and their interactions identified in brain imaging Emotional and conceptual contents of voice sounds in animals are fused Evolution of human language has demanded splitting of emotional and conceptual contents and mechanisms although language prosody still carries emotional content Is it a dying off remnant or is it fundamental for interaction between language and cognition If language and cognitive mechanisms differ unifying these two contents requires motivation hence emotions What are these emotions Can they be measured Tonal languages use pitch contours for semantic contents are there differences in language cognition interaction among tonal and atonal languages Are emotional differences among cultures exclusively cultural or also depend on languages Interaction of language and cognition is thus full of mysteries and we encourage papers addressing any aspect of this topic

Electrical Engineer Interview Questions and Answers - English Navneet

Singh, Here are some common electrical engineer interview questions along with example answers

Can you describe your experience with electrical engineering projects

Example Answer During my career as an electrical engineer I ve had the opportunity to work on a variety of projects spanning different industries For example in my previous role at XYZ Company I was involved in designing and implementing electrical systems for commercial buildings including power distribution lighting and HVAC control systems I ve also worked on projects involving renewable energy systems such as solar power and wind turbines where I contributed to the design testing and optimization of electrical components Overall my experience has provided me with a strong foundation in electrical engineering principles and practical skills in project management problem solving and collaboration

What software tools are you proficient in for electrical engineering design and analysis

Example Answer I m proficient in a variety of software tools commonly used in electrical engineering design and analysis This includes CAD software such as AutoCAD and SolidWorks for creating electrical schematics layouts and 3D models I m also experienced in simulation and analysis tools like MATLAB and Simulink for modelling electrical systems performing circuit analysis and simulating dynamic behaviour Additionally I have experience with specialized software for power system analysis such as ETAP and PSS E which I ve used for designing and analysing power distribution networks conducting load flow studies and assessing system stability

How do you approach problem solving in electrical engineering projects

Example Answer When faced with a problem in an electrical engineering project my approach is to first thoroughly understand the problem and identify the underlying causes or factors contributing to it I gather relevant information review technical specifications and requirements and consult with colleagues or subject matter experts as needed I then develop a systematic approach to address the problem breaking it down into smaller tasks or components that can be analysed and addressed individually Throughout the problem solving process I prioritize safety reliability and efficiency considering the impact of potential solutions on overall system performance and functionality I also document my analysis decisions and outcomes to ensure transparency and facilitate future troubleshooting or improvements

Can you discuss a challenging electrical engineering project you ve worked on and how you overcame obstacles

Example Answer One of the most challenging projects I ve worked on was a large scale industrial automation project aimed at upgrading and modernizing an existing manufacturing facility The project involved integrating new automated equipment and control systems into the existing production lines while minimizing downtime and ensuring seamless operation One of the main obstacles we encountered was compatibility issues between the legacy equipment and the new control systems which led to communication errors and performance issues during testing To overcome this challenge I collaborated closely with the project team to identify the root causes of the compatibility issues and develop solutions to address them This involved modifying the communication protocols updating firmware and software configurations and implementing hardware modifications as needed I conducted

thorough testing and validation to verify the effectiveness of the solutions and worked closely with the operations team to ensure a smooth transition to the new systems Despite the challenges we were able to successfully complete the project on schedule and within budget achieving significant improvements in productivity efficiency and reliability for the client This experience taught me the importance of proactive problem solving effective communication and collaboration in overcoming obstacles and delivering successful outcomes in complex engineering projects How do you stay updated with advancements in the field of electrical engineering Example Answer As an electrical engineer I understand the importance of staying updated with advancements in the field to remain competitive and continue delivering high quality work To stay informed I regularly read industry publications journals and technical articles to learn about the latest research findings emerging technologies and best practices in electrical engineering I also participate in professional development activities such as workshops seminars and webinars to expand my knowledge and skills in areas of interest Additionally I m a member of professional organizations like the Institute of Electrical and Electronics Engineers IEEE where I have access to networking opportunities conferences and online resources to stay connected with industry trends and developments *TEST*
