Employment Relations in France Alan Jenkins, 2006-04-18 This book is the fruit of a number of years of assimilating another culture and learning about the evolution of its institutions altogether an incredibly rich and rewarding experience I hope to pass on to the reader some of that richness in the belief that even in a globalizing context learning about other nations and cultures is more and more necessary The reasons and values behind this belief are perhaps evident but I am convinced that they bear repeating here To begin with the hasty generalizations that often lie behind the cynicism and ultimately the violence of ethnocentrism and xenophobia are still being aired today and still need to be fought even in unified and advanced regions of the world like Europe and the United States The historical and social sciences disciplines need to be solicited constantly in this combat even though they themselves are terrains of controversy and contestation I personally have not lost faith in their progressive potential and character Second my belief is that only through this process of appeal to these disciplines and their findings can we resist a dangerous contemporary slide into simplistic and sensationist pictures of the world viewpoints often associated with an implicit assumption that social and economic change are linear processes so how unfolding according to the same neat logic wherever they are at work **EEI Bulletin** Edison Electric Institute, 1969
