Glovebox Pressure Relief and Check Valve ,1986 This device is a combined pressure relief valve and check valve providing overpressure protection and preventing back flow into an inert atmosphere enclosure The pressure relief is embodied by a submerged vent line in a mercury reservoir the relief pressure being a function of the submerged depth The pressure relief can be vented into an exhaust system and the relieving pressure is only slightly influenced by the varying pressure in the exhaust system The check valve is embodied by a ball which floats on the mercury column and contacts a seat whenever vacuum exists within the glovebox enclosure Alternatively the check valve is embodied by a vertical column of mercury the maximum back pressure being a function of the height of the column of mercury Fuel Level Control Valves and Systems AE-5A Aerospace Fuel, Inerting and Lubrication Sys Committee,2021 A fuel level control valve system controls the quantity of fuel in a tank being filled or emptied on the aircraft This document provides a general familiarization with these mechanisms e g forms they take functions system design considerations This document provides the aircraft fuel system designer with information about these mechanisms devices so that he can prescribe the types of level control valves systems which are best suited for his particular fuel system configuration The scope has been expanded as different aircraft manufacturers may use different type of fuel system architectures Their refueling and defueling systems may take different configurations may require different types of fuel control valves and may require different types of interface with the onboard Fuel Measurement System They must also limit pressure surges and be compatible with ground refueling equipment which have varying surge potentials and create surges This revision to the Fuel Level Control Valve System addresses the addition of more valve technologies and the interface of the refuel valves with the refuel system including the Fuel Quantity Indication System Analysis of Check Valve 578.
