Virginia M. Jagla, Andrew Furco, Jean R. Strait, 2015-02-01 Service learning is a powerful method of teaching and learning that has been used effectively for more than two decades Its efficacy has been researched in a variety of ways and this volume continues to expand that research base In particular in this volume Service Learning Pedagogy How Does It Measure Up we explore three broad areas of service learning research and practice that reflect broader discussions of the role of pedagogy in today s educational reform efforts Teacher Education Crossing Boundaries Deepening Relationships in Service Learning and New Paradigms Conceptual Frameworks Many have called for more rigorous methods when researching service learning pedagogy That has been the major impetus for this volume We seek to generate knowledge regarding service learning pedagogy while developing theories about it We surface some elusive affective characteristics of the pedagogy which we

People - Marine Mammal Interactions Andrew Butterworth, Mark P. Simmonds, 2017-08-15 Our relationships with marine mammals are complex We have used them as resources and in some places this remains the case viewed them as competitors and culled them again ongoing in some localities been so captivated and intrigued by them that we have taken them into captivity for our entertainment and developed a lucrative eco tourism activity focused on them in many nations When we first envisaged this special topic we had two overarching aims Firstly we hoped to generate critical evaluation of some of our relationships with these animals Secondly we hoped to attract knowledgeable commentators and experts who might not traditionally publish in the peer reviewed literature We were also asking ourselves a question about what responsibility mankind might have to marine mammals on our rapidly changing planet The answer to the question can or should humans have responsibility for the lives of marine mammals when they are affected by our activities is in our opinion yes and the logical progression from this question is to direct research and effort to understand and optimise the actions reactions and responses that mankind may be able to take We hope that the papers in this special issue bring some illumination to a small selection of topics under this much wider topic area and prove to be informative and stimulating
