Breaking Point Rebecca Schwartz Greene,2023-01-03 WINNER SOCIETY FOR MILITARY HISTORY DISTINGUISHED BOOK AWARDS FIRST BOOK This book informs the public for the first time about the impact of American psychiatry on soldiers during World War II Breaking Point is the first in depth history of American psychiatry in World War II Drawn from unpublished primary documents oral histories and the author s personal interviews and correspondence over years with key psychiatric and military policymakers it begins with Franklin Roosevelt s endorsement of a universal Selective Service psychiatric examination followed by Army and Navy pre and post induction examinations Ultimately 2 5 million men and women were rejected or discharged from military service on neuropsychiatric grounds Never before or since has the United States engaged in such a program In designing Selective Service Medical Circular No 1 psychiatrist Harry Stack Sullivan assumed psychiatrists could predict who might break down or falter in military service or even in civilian life thereafter While many American and European psychiatrists questioned this belief and huge numbers of American psychiatric casualties soon raised questions about screening s validity psychiatric and military leaders persisted in 1942 and

1943 in endorsing ever tougher screening and little else. Soon families complained of fathers and teens being drafted instead of being identified as psychiatric 4Fs and Blacks and Native Americans among others complained of bias. A frustrated General George S. Patton famously slapped two malingering neuropsychiatric patients in Sicily, a sentiment shared by Marshall and Eisenhower though they favored a tamer style. Yet psychiatric rejections, evacuations and discharges mounted. While psychiatrist Roy Grinker and a few others treated soldiers close to the front in Tunisia in early 1943, this was the exception. But as demand for manpower soared and psychiatrists finally went to the field and saw that combat itself, not predisposition, precipitated breakdown, leading military psychiatrists switched their emphasis from screening to prevention and treatment. But this switch was too little, too late and slowed by a year-long series of Inspector General investigations even while numbers of psychiatric casualties soared. Ironically, despite and even partly because of psychiatrists' wartime performance plus the emotional toll of war, postwar America soon witnessed a dramatic growth in numbers, popularity and influence of the profession, culminating in the National Mental Health Act 1946. But veterans with PTSD not recognized until 1980 were largely neglected.

Failing Our Future Joshua R. Eyler, 2024-08-27. An indictment of the grading system in American schools and colleges and a blueprint for how we can change it. One of the most urgent and long-standing issues in the US education system is its obsession with grades. In *Failing Our Future*, Joshua R. Eyler shines a spotlight on how grades inhibit learning, cause problems between parents and children, amplify inequities and contribute to the youth mental health crisis. Eyler, who runs the Center for Excellence in Teaching and Learning at the University of Mississippi, illustrates how grades interfere with students' intrinsic motivation and perpetuate the idea that school is a place for competition rather than discovery. Grades force students to focus on rewards and distract them from exploring ideas or pursuing interests beyond what they'll be tested on. In fact, grades significantly impede the learning process. They are also significantly affecting children's physical, emotional and psychological well-being. Rates of anxiety, depression and suicidal ideation have spiked and academic stress tied to grades is a leading cause of this escalation. Eyler shares success stories of grading reform efforts that are already under way as an antidote to the harms caused by the practices currently used in educational institutions. Equal parts scathing and hopeful, *Failing Our Future* aims to improve the lives of students by encouraging them to define success on their own terms. Parents, educators, policymakers and students will find in these pages a rallying cry for change and a blueprint for how to implement reforms in our homes and classrooms.

An African American Dilemma Zoë Burkholder, 2021-07-11. *An African American Dilemma* offers the first social history of northern Black debates over school integration versus separation from the 1840s to the present. Since *Brown v. Board of Education* in 1954, Americans have viewed school integration as a central tenet of the Black civil rights movement. Yet school integration was not the only or even always the dominant civil rights strategy. At times, African Americans also fought for separate Black-controlled schools dedicated to racial uplift and community empowerment. *An African American Dilemma* offers a social history of these debates.

within northern Black communities from the 1840s to the present Drawing on sources including the Black press school board records social science studies the papers of civil rights activists and court cases it reveals that northern Black communities urban and suburban vacillated between a preference for either school integration or separation during specific eras Yet there was never a consensus It also highlights the chorus of dissent debate and counter narratives that pushed families to consider a fuller range of educational reforms A sweeping historical analysis that covers the entire history of public education in the North this work complicates our understanding of school integration by highlighting the diverse perspectives of Black students parents teachers and community leaders all committed to improving public education It finds that Black school integrationists and separatists have worked together in a dynamic tension that fueled effective strategies for educational reform and the Black civil rights movement a discussion that continues to be highly charged in present day schooling choices
