Marshak, 2022-01-25 By examining a suite of over 90 indicators for 9 major US fishery ecosystem jurisdictions the authors systematically track the progress the country has made towards advancing EBFM and making it an operational reality lessons which are applicable to oceans globally

Technological Innovation in Legacy Sectors William B. Bonvillian, Charles Weiss, 2015-08-18 The American economy faces two deep problems expanding innovation and raising the rate of quality job creation Both have roots in a neglected problem the resistance of Legacy economic sectors to innovation While the U S has focused its policies on breakthrough innovations to create new economic frontiers like information technology and biotechnology most of its economy is locked into Legacy sectors defended by technological economic political social paradigms that block competition from disruptive innovations that could challenge their models Americans like to build technology covered wagons and take them out west to open new innovation frontiers we don't head our wagons back east to bring innovation to our Legacy sectors By failing to do so the economy misses a major opportunity for innovation which is the bedrock of U S competitiveness and its standard of living Technological Innovation in Legacy Sectors uses a new unifying conceptual framework to identify the shared features underlying structural obstacles to innovation in major Legacy sectors energy air and auto transport the electric power grid buildings manufacturing agriculture health care delivery and higher education and develops approaches to understand and transform them It finds both strengths and obstacles to innovation in the national innovation environments a new concept that combines the innovation system and the broader innovation context for a group of Asian and European economies Manufacturing is a major Legacy sector that presents a particular challenge because it is a critical stage in the innovation process By increasingly offshoring production the U S is losing important parts of its innovation capacity Innovate here produce here where the U S took all the gains of its strong innovation system at every stage is being replaced by innovate here produce there which threatens to lead to produce there innovate there To bring innovation to Legacy sectors authors William Bonvillian and Charles Weiss recommend that policymakers focus on all stages of innovation from research through implementation They should fill institutional gaps in the innovation system and take measures to address structural obstacles to needed disruptive innovations In the specific case of advanced manufacturing the production ecosystem can be recreated to reverse jobless innovation and add manufacturing led innovation to the U S's still strong research oriented innovation system

The Heartbeat of Innovation Edward Shorter, Hugh E. Scully, Bernard S. Goldman, 2022-03-01 Great innovations take place within great institutions Founded in 1819 Toronto General Hospital TGH is one of Canada's oldest hospitals and has created a nurturing environment for early Canadian innovations in heart surgery The Heartbeat of Innovation tells the story of the brilliant surgeons who worked there and the hospital environment that provided an incubator to the many people skilled perfusionists dedicated nurses and pioneering cardiologists who participated in the revolution in heart surgery that

took place along University Avenue in Toronto Supported by historical records hospital archives personal memoirs and interviews this book is an extensive and descriptive account of the seemingly inexorable development of cardiac surgery at this leading academic health science centre It pursues several themes the complexity of this surgical specialty its generally male dominated nature the trend toward teamwork in practice and the evolution and incorporation of original research into this branch of healthcare These strands are woven together to demonstrate how the TGH has evolved into such a dominant leader in the competitive and demanding field of cardiac surgery Canadian hearts may beat with pride at the knowledge that one of the major stories in modern medicine took place here and continues here

The Politics and Crisis Management of Animal Health Security John Connolly,2016-03-09 The Politics and Crisis Management of Animal Health Security addresses the 2001 foot and mouth epidemic in the United Kingdom one of if not the most significant crises ever to face the UK farming industry Underpinned by interviews with politicians and bureaucrats and with significant primary documentary analysis the book shows that the crisis was a critical juncture in how disease outbreaks have been planned and managed ever since The author explores how this event affected policy and governance arrangements for managing subsequent disease induced threats such as avian influenza and bovine TB and concludes by considering the temporality of lesson learning by the UK government including the current and future challenges associated with managing incongruent risks e g flood protection swine flu and Ebola This book provides students of public policy and administration with a significant illustration of how key concepts and analytical lenses from public policy can be applied to the study of the contours of practical policy change

The Rhetorical Invention of America's National Security State Marouf Hasian Jr.,Sean

Lawson, Megan D. McFarlane, 2015-07-29 *The Rhetorical Invention of America's National Security State* examines the rhetoric and discourse produced by and constitutive of America's national security state. Hasian Lawson and McFarlane illustrate the importance of rhetoric to the expansion of the American national security state in the post 9/11 era through their examination of the global war on terrorism, enhanced interrogation techniques, drone crew stress activities, Edward Snowden's rise of Special Forces, and popular representations of counterterrorism. The coauthors contend this expansion was not the result of lone imperial executives or a nefarious state within a state but was co-produced by elite and non-elite Americans alike who not only condoned but also in many cases demanded the expansion of the national security state. This work will be of interest to scholars in communication studies and political science. California Dreaming Lawrence J. McQuillan, 2015-05-01 A politically created crisis of epic proportions is brewing in California and elsewhere across the United States. For decades, public pension officials and politicians of both parties have promised their employees increasingly generous retirement benefits while lowballing the contributions from government agencies and employees that are needed to cover these promises, presenting our greatest financial challenge since the Great Depression. Pushing the pension liability from today and onto our children and grandchildren leaves them with a depleted future and a potentially bankrupt California. State and local governments will scramble to find funds, forcing them to raise taxes, slash public services, and/or declare bankruptcy. Schools, parks, emergency services, and public employee retirement benefits will be at risk. Politicians will defer until circumstances force them to reckon with a disaster of their own making. The problem: For far too long, state and local governments have promised their employees increasingly generous retirement benefits but without ensuring that sufficient funds will be on hand when the pension payments come due. In *California Dreaming*, Lawrence J. McQuillan pulls back the curtains covering this unfunded liability crisis. He describes the true extent of the problem, explains the critical factors that are driving public pension debt sky high, and exposes the perverse incentives of lawmakers and pension officials that reward them for not fixing the problem and letting it escalate. Finally, he offers the six crucial reforms needed to restore the financial health of California and other threatened jurisdictions. If *California Dreaming's* roadmap for reform is adopted, the prospects for achieving a thriving, balanced, and equitable future are highly favorable in California, and any state or municipality facing its own public pension problem. If not, the many opportunities that once made the Golden State seem like a Promised Land will quickly evaporate. Lynton Keith Caldwell Wendy Read Wertz, 2014-04-08 A solid overview of both Caldwell's contributions and the development of the environmental movement in the US. Recommended Choice. This is the story of a visionary leader, Lynton Keith Caldwell, who in the early 1960s introduced the study of the environment and environmental policy at a time when such areas of expertise did not exist. Caldwell was a principal architect of the National Environmental Policy Act of 1969 and is recognized as the inventor of the Act's important environmental impact statement provisions, now emulated around the world. For the next three decades, Caldwell played a leading role in establishing ethics-based

environmental policy and administration as major areas of inquiry in the United States and around the world Through his tireless global travels writing and lectures and his work with the US Senate the IUCN UN and UNESCO Caldwell became recognized for his contributions to environmental ethics and the development of strong environmental planning and policy This engrossing biography is based on interviews the author conducted with Caldwell and on unrestricted access to his memorabilia photos and records Deeply insightful The field of environmental policy is richer for this addition H Net Reviews

This Changes Everything Naomi Klein, 2014-09-16 The most important book yet from the author of the international bestseller *The Shock Doctrine* a brilliant explanation of why the climate crisis challenges us to abandon the core free market ideology of our time restructure the global economy and remake our political systems In short either we embrace radical change ourselves or radical changes will be visited upon our physical world The status quo is no longer an option In *This Changes Everything* Naomi Klein argues that climate change isn't just another issue to be neatly filed between taxes and health care It's an alarm that calls us to fix an economic system that is already failing us in many ways Klein meticulously builds the case for how massively reducing our greenhouse emissions is our best chance to simultaneously reduce gaping inequalities re-imagine our broken democracies and rebuild our gutted local economies She exposes the ideological desperation of the climate change deniers the messianic delusions of the would-be geoengineers and the tragic defeatism of too many mainstream green initiatives And she demonstrates precisely why the market has not and cannot fix the climate crisis but will instead make things worse with ever more extreme and ecologically damaging extraction methods accompanied by rampant disaster capitalism Klein argues that the changes to our relationship with nature and one another that are required to respond to the climate crisis humanely should not be viewed as grim penance but rather as a kind of gift a catalyst to transform broken economic and cultural priorities and to heal long festering historical wounds And she documents the inspiring movements that have already begun this process communities that are not just refusing to be sites of further fossil fuel extraction but are building the next regeneration-based economies right now Can we pull off these changes in time Nothing is certain Nothing except that climate change changes everything And for a very brief time the nature of that change is still up to us

Boys, Young Men and Violence Ken Harland, Sam McCready, 2015-10-29 This book draws upon data collected over an 18 year period with over 1000 boys and young men across Northern Ireland Providing critical reflections on violence masculinity and education it uses the voices and experiences of young men to inform and influence research practice and policy

The Protection and Conservation of Water Resources Hadrian F. Cook, 2017-03-13 This book is about water in Britain and in the world It is about water resources their conservation protection of water quality for human consumption and aquatic ecosystems Since the publication of the first edition in 1998 major political and regulatory changes have taken place this book provides a clear and comprehensive update of conservation and water resource management issues in the UK over the past two decades and in an expansion of its original UK

perspective now includes examples of global best practice The UK's 2003 adoption of the EU Water Framework Directive has had enormous implications for the conservation and management of our water resources In 2016 with the UK's decision to leave the EU the governance scene is entering upon an unpredictable future regarding its major water resource policies The Protection and Conservation of Water Resources Second edition provides a clear and comprehensive update of conservation and water resource management issues Chapter 1 deals with sustainability and water policy outlines the issues and challenges and asks what is integrated water management Chapter 2 reviews water availability and sufficiency in Britain while Chapter 3 explores the dynamic between institutions and legislative framework Chapter 4 introduces the catchment approach and chapters 5 and 6 explore the issues of sustaining bulk supply and the imperatives of climate change Chapter 7 looks at the contemporary background to water quality issues and Chapter 8 provides case studies of catchment problems both urban and rural Chapter 9 describes solutions in land use change including technical fixes and their sustainability Chapter 10 is concerned with emerging governance arrangements and Chapter 11 takes a global view looking at successful examples around the world to find positive lessons from Europe north America and Australia **From Berlin to Baghdad**

Hal Brands, 2014-10-17 On November 9 1989 a mob of jubilant Berliners dismantled the wall that had divided their city for nearly forty years this act of destruction anticipated the momentous demolition of the European communist system Within two years the nations of the former Eastern Bloc toppled their authoritarian regimes and the Soviet Union ceased to exist fading quietly into the shadows of twentieth century history and memory By the end of 1991 the United States and other Western nations celebrated the demise of their most feared enemy and reveled in the ideological vindication of capitalism and liberal democracy As author Hal Brands compellingly demonstrates however many American diplomats and politicians viewed the fall of the Soviet empire as a mixed blessing For more than four decades containment of communism provided the overriding goal of American foreign policy allowing generations of political leaders to build domestic consensus on this steady reliable foundation From Berlin to Baghdad incisively dissects the numerous unsuccessful attempts to devise a new grand foreign policy strategy that could match the moral clarity and political efficacy of containment Brands takes a fresh look at the key events and players in recent American history In the 1990s George H W Bush envisioned the United States as the guardian of a new world order and the Clinton administration sought the enlargement of America's political and economic influence However both presidents eventually came to accept albeit grudgingly that America's multifaceted roles responsibilities and objectives could not be reduced to a single fundamental principle During the early years of the George W Bush administration it appeared that the tragedies of 9 11 and the subsequent war on terror would provide the organizing principle lacking in U S foreign policy since the containment of communism became an outdated notion For a time most Americans were united in support of Bush's foreign policies and the military incursions into Afghanistan and Iraq As the swift invasions became grinding occupations however popular support for Bush's policies waned and the rubric of the war on

terror lost much of its political and rhetorical cachet From Berlin to Baghdad charts the often onerous course of recent American foreign policy from the triumph of the fall of the Berlin Wall to the tragedies of 9 11 and beyond analyzing the nation s search for purpose in the face of the daunting complexities of the post Cold War world **Majolica Mania** Susan Weber,2021-01-12 The first comprehensive study of the most important ceramic innovation of the 19th century Colorful wildly imaginative and technically innovative majolica was functional and aesthetic ceramic ware Its subject matter reflects a range of 19th century preoccupations from botany and zoology to popular humor and the macabre Majolica Mania examines the medium s considerable impact from wares used in domestic settings to monumental pieces at the World s Fairs Essays by international experts address the extensive output of the originators and manufacturers in England including Minton Wedgwood and George Jones and the migration of English craftsmen to the U S New research including information on important American makers in New York Baltimore and Philadelphia is also featured Fully illustrated the book is enlivened by new photography of pieces from major museums and private collections in the U S and Great Britain *Banned History* Lynsey Calver,2022-08-11 Banned History is all the juicy bits of History which were excluded from your lessons at school It unashamedly probes into the darker side of some of Britain s most admired leaders as well as exploring the hateful and depraved nature of humanity across the last 5000 years Banned History answers questions which are deliberately avoided by the school curriculum due to the negative light Britain may be portrayed such as the real reason why Britain didn t bomb Auschwitz and how the Transatlantic Slave Trade came into being Topical issues such as whether Churchill was a racist and how homophobia developed and spread across the world are explored in depth Concepts which are too horrific to ever feature in the school curriculum are investigated to reveal how many years it takes for incest to wipe out a family what the most effective method of torture is and what kind of person tastes best Written in a bright and breezy tone Banned History is full of fascinating facts such as who discovered dolphins and who fell in love with one why America got involved in the Vietnam war why Russia turned communist how Martin Luther King got his name how many people Europe killed with their colonisation of the Americas and when and why the British government legalised men hitting their wives Welcome to the sort of History you definitely didn t get taught at school **Gender in Cross-Cultural Perspective** Adrienne E. Strong,Richard Powis,2024-08-19 This fully updated new edition of Gender in Cross Cultural Perspective carefully introduces and responds to changes in anthropological approaches to and perspectives on gender With two new editors and new authors from the Global South and underrepresented communities it combines theoretically and ethnographically based chapters to examine gender roles and ideology around the world The books is divided thematically into five parts with the editors opening each section with a succinct introduction to the principal issues The book retains some of the classic chapters while offering new contributions and extended discussions throughout on methodology It also has entirely new contributions that reflect more recent developments in the discipline including more emphasis on LGBTQ communities COVID and migration This new

edition also features additional support for teaching and learning including a film list and discussion questions that are now offered as supplemental online materials The eighth edition of *Gender in Cross Cultural Perspective* continues to be an essential resource for undergraduate and graduate students encountering the anthropology of gender for the first time
