**Economics of Natural Resources, the Environment and Policies** E. Kula,2012-12-06 The economic activities of humanity particularly during the last couple of centuries have had a profound impact on the natural environment Fast depletion of the world's forest resources fish stocks fossil fuels and mine deposits have raised many moral as well as practical questions concerning present and future generations Furthermore a number of global environmental problems such as acid rain the greenhouse effect and depletion of the ozone layer are causing concern throughout the world What does economics say about the exploitation of nature's scarce resources This book which is a much expanded version of an earlier publication *Economics of Natural Resources and the Environment* aims mostly at final year undergraduates reading subjects such as economics business studies environmental science forestry marine biology agriculture and development studies There is also a good deal of material especially in the chapters on fisheries forestry valuation and discounting that post graduate students may find useful as stepping stones The material presented stems from my lectures to final year students at the University of Ulster during the last 12 years and some of my ongoing research work When I moved to Northern Ireland in 1982 I was given a course called *Economics of Exhaustible Resources* to teach This has changed its title and focus a number of times along with the structure of the University My early reading lists included a number of journal articles and books written on the subject

System-Theoretic Methods in Economic Modelling I S. Mittnik,2014-06-28 The value of applying system theoretic concepts to economic modelling problems arises from the fact that it offers a unifying framework for modelling dynamic systems In addition to offering this powerful conceptual framework it provides a wide range of tools useful in applied work System theoretic techniques enter predominantly two stages of economic modelling efforts the stage of model construction and the stage of model application in accordance with the modelling The objective of this and subsequent volumes on *System Theoretic Methods in Economic Modelling I* is to initiate and or intensify dialogues between researchers and practitioners within and across the disciplines involved This first volume brings together papers exhibiting a wide range of system theoretic techniques and applications to economic problems The papers have been divided into two groups following roughly but not necessarily the above classification into the construction and application stages of economic modelling The papers in the first group focus on the identification of dynamic and static systems while the papers in the second group address
