

Beginner's SETUP GUIDE for NANOSTATION-M2 as receiver

and other Ubiquity airMAX devices using AirOS firmware v5 (Windows/MacOS)

This guide is primarily intended for **mobile users** (boaters, campers and truckers) who often change access points. Fixed users can also use it, although there might be other more suitable configurations for them.

Make sure the Nanostation-M2 (Nano for short) "Main" LAN socket is connected to your computer's network card with network cables, via the POE power injector (for a 12VDC power source, use a passive power injector rather than the AC one normally supplied). There should then be at least one LED lit on the back of the Nanostation. On the original Nanostation shipping box, find and write down the default IP address (we assume: 192.168.1.20), the user name and password (should both be "ubnt"). Do not loose this information!

- 1) Set your computer to communicate with Nano (only done once)
 - 1a) Windows
 - 1b) Mac OS X
- 2) Program Nano as receiver (station) and router (only done once)
- 3) Choose and connect to a WIFI signal (done to find a new access point)
