Alavi, 2019-11-28 Computational intelligence is a general term for a class of algorithms designed by nature s wisdom and human intelligence Computer scientists have proposed many computational intelligence algorithms with heuristic features These algorithms either mimic the evolutionary processes of the biological world mimic the physiological structure and bodily functions of the organism imitate the behavior of the animal s group mimic the characteristics of human thought language and memory processes or mimic the physical phenomena of nature hoping to simulate the wisdom of nature and humanity enables an optimal solution to the problem and solves an acceptable solution in an acceptable time Computational intelligent algorithms have received extensive attention at home and abroad and have become an important research direction of artificial intelligence and computer science This book will introduce the application of intelligent optimization algorithms in detail from the aspects of computational intelligence job shop scheduling problems multi objective optimization problems and Leisure, Sport and Tourism, Politics, Policy and Planning, 4th Edition A J Veal, 2017-05-05 The machine learning gap between theory and practice in the leisure sport and tourism studies areas seems to have widened as scholars have become more specialized Nevertheless it is imperative that students be as familiar as possible with a wide range of social and political theory and also be able to reconcile that knowledge with their own current and future roles as practicing professionals As well as extensive updating of sources this new edition examines such topics as libertarianism theocracy anti establishment politics and the concept of generations A new chapter presents discussions of a number of issues and
