Factor Impact Journal 22:

An ex-post impact assessment of IFPRI's GRP22 program, Water Research Allocation Bennett, Jeffrey W., 2013-04-10 The performance of the International Food Policy Research Institute's IFPRI's research program that focuses on water resource issues is reviewed for the period 1994-2010 around the three themes that constitute the program: global modeling, river basin modeling, and institutions. The IFPRI water team has been involved in leading edge research in a number of dimensions: it has focused on analysis at varying geographic scales; the work has been truly interdisciplinary by engaging economics with biophysical science and other social sciences; and research outputs have been innovative in advancing institutional analysis and water pricing and in policy measures addressing the complexities of water supply management. In the research tasks, IFPRI's water team actively collaborated with a wide range of researchers from within the CGIAR network, national research institutes, and universities. Within the team, a largely stable group of leaders has been responsible for the professional development of a substantial cohort of junior staff who have moved onto successful careers elsewhere. The output of the program has been prolific and prominent in academic, policy, and development communities. The approach taken is to review selected publications from the themes, assess the quality of the journals in which papers have been published, and evaluate the performance on average of researchers in the program. In addition, surveys of stakeholders were carried out, and three specific projects were subjected to detailed review. The assessment demonstrated the high regard in which the program's research outputs and researchers are held. The IFPRI water team has been remarkably productive throughout the 16 years considered, working on issues that are of high relevance to policy and producing work that has largely been cutting edge. However, impacts generated by individual projects were not consistently or readily identifiable. To maximize the benefits of this performance and to overcome challenges associated with securing more outcomes, this report recommends that a more coordinated approach be taken to develop the research project portfolio. This would involve better targeting of projects to policy objectives through a more systematic review of research demand forces and improved integration of research work with policy development processes. The latter, in particular, requires the development of a sense of research project ownership within the policy circles; the research is designed to influence. More effort in the development of in-country research partnerships can aid this process, as local researchers can act as champions within local policy circles. Where government agencies have a research function, their integration into the partnerships is recommended. Avoidance of completing research projects in a policy vacuum is critical but requires both advanced planning of each research project as well as constant adaptation of the work plan to often rapidly evolving policy contexts. To achieve project impacts beyond the immediacy of the specific case study context, a more targeted and coordinated publication strategy should be developed in light of changing publication technology. Project webpages within the IFPRI website, with readily downloadable reports, are useful during the implementation of each project, and more formal papers should be targeted for publication in high impact factor technical

journals with parallel papers prepared for more policy oriented journals that have high circulations

Business Environment and Technological Innovation- Emerging Trends Dr M Ganesh Babu, Dr C Suresh, Dr B Nagarjuna, Dr G Vani, Dr Amb. Parin Somani, **Open Innovation in the Financial Services** Daniel Fasnacht, 2009-02-11. Open innovation means gathering new ideas from sources beyond organizational boundaries. It occurs when solutions to address clients' needs are developed in collaboration and the resulting products and services are distributed through a flexible network of partners. Daniel Fasnacht's book, the first of its kind, discusses open business models in the context of the financial services industry. He elaborates the drivers for strategic change such as increasingly sophisticated clients or demanding shareholders among other trends including the recent global financial crisis and explains why the transition from a closed model of operation to open innovation is vital. Various case studies illustrate how to integrate the client into the firm's innovation process and emphasize the importance of smart client segmentation and a holistic advisory model to serve clients around the globe. Leaders must develop a set of new management practices to be able to invest in multiple strategic directions. They are responsible for giving clients a remarkable experience and for creating social relationship capital based upon an open innovation culture. Open Innovation in the Financial Services provides a much needed framework for helping to understand industry dynamics in banking and to make the most of organizational energy by using open innovation to sustain profitable growth. The book comes at the right time and offers a new mindset for business not only for expansion strategies in general but especially during turbulent times.
