**Introduction to Teaching** Gene E. Hall, Linda F. Quinn, Donna M. Gollnick, 2015-12-09 Introduction to Teaching Making a Difference in Student Learning Second Edition is the ideal text for aspiring teachers. Acclaimed authors Gene Hall, Linda Quinn, and Donna Gollnick thoroughly prepare teacher education candidates to make a difference as teachers presenting first-hand stories and evidence-based practices while offering a student-centered approach to learning. The authors target one of the biggest challenges facing many of today's schools: making sure that all students are learning and help teachers make student learning the primary focus in all that they do. From true-to-life challenges that teachers will face to high-stakes testing, student learning assessments, low teacher retention, Common Core Standards, to the inspiration and joy they will discover throughout their teaching careers, this text paints a realistic picture of the real life of a teacher. **Teaching Copyright**

Sara E. Wolf, 2024-12-12 Lessons, resources, and annotated answer keys for instructors at all levels in teaching copyright law. The teaching of copyright and related concepts can easily be overwhelming to instructors who are experts in their field but may have little to no detailed understanding of copyright law. They require reliable, accessible information to coach students on copyright-related matters. Teaching Copyright: Practical Lesson Ideas and Instructional Resources provides explicit guidance based on U.S. copyright law in the teaching of copyright and related concepts to learners at schools, colleges, and universities. Instructors are supported with time-saving resources such as lesson templates, scenarios, practice activities, and a downloadable test question bank. Additionally, Bloom's Taxonomy labels lessons, activities, and assessment items to enable an appropriately diverse set of learning for students. Instead of reducing copyright to simple recall, the lessons and information in this text will help instructors develop higher-level thinking about copyright and assist them in measuring learners' abilities not just to remember but also to analyze and evaluate copyright dilemmas.
