Kovalev,Sergei O. Kuznetsov,Aleksandr I. Panov,2021-10-04 This book constitutes the proceedings of the 19th Russian Conference on Artificial Intelligence RCAI 2021 held in Moscow Russia in October 2021 The 19 full papers and 7 short papers presented in this volume were carefully reviewed and selected from 80 submissions The conference deals with a wide range of topics categorized into the following topical headings cognitive research data mining machine learning classification knowledge engineering multi agent systems and robotics natural language processing fuzzy models and soft computer intelligent systems and tools for designing intelligent systems **Understanding Origins** Francisco J. Varela,J.P. Dupuy,2013-03-09 The main intention of this book is to bring together contributions from biology cognitive science and the humanities for a joint exploration of some of the main contemporary notions dealing with the understanding of origins in life mind and society The question of origin is inseparable from a web of hypotheses that both shape and explain us Although origin invites examination it always seems to elude our grasp Notions have always been produced to interpret the genesis of life mind and the social order and these notions have all remained unstable in the face of theoretical and empirical challenges In any given period the central ideas on origin have had a mutual resonance frequently overlooked by specialists engaged in theirown particular fields As a consequence this book should be of interest to a wide audi ence In particular for all those engaged in the social sciences and the philosophy of science it is unique document since bridges to the natural sciences in a mutually illuminating way are hard to find Whether as a primary source or as inspirational reading we feel this book has a place in every library The material comes from an international meeting held in September 13 16 1987 at Stanford University organized by F Varela and J P Dupuy at the request of the Program of Interdisciplinary Research of Stanford University We are grateful to Rene Girard the Program Director for making it possible with the help of the Mellon Foundation **Web Information Systems and Applications** Xiang Zhao,Shiyu Yang,Xin Wang,Jianxin Li,2022-12-07 This book constitutes the proceedings of the 19th International Conference on Web Information Systems and Applications WISA 2022 held in Dalian China in September 2022 The 45 full papers and 19 short papers presented were carefully reviewed and selected from 212 submissions The papers are grouped in topical sections on knowledge graph natural language processing world wide web machine learning query processing and algorithm recommendation data privacy and security and blockchain **Contemporary Perspectives on the Detection, Investigation and Prosecution of Art Crime** Duncan

   Artificial Intelligence in the Pacific Rim Hozumi Tanaka,1991 In the last decade AI firmly settled into our industrial society with the expert systems as the representative product However almost every one of the systems could cover only a single task domain In the highly mechanized world of the 21st century systems will become smart and user friendly enough to cover a wide range of task domains Systems with much user friendliness must be multilingual because users in different domains usually have different languages Language is formed in its own culture Therefore promotion for cross cultural scientific interchange will be indispensable for the progress of AI   Methods and Applications of Artificial Intelligence ,2004   Anonymous Speech Eric Barendt,2016-07-14 Anonymous Speech Literature Law and Politics discusses the different contexts in which people write anonymously or with the use of a pseudonym novels and literary reviews newspapers and political periodicals graffiti and now on the Internet The book criticises the arguments made for a strong constitutional right to anonymous speech though it agrees that there is a good case for anonymity in some circumstances notably for whistle blowing One chapter examines the general treatment of anonymous speech and writing in English law while another is devoted to the protection of journalists sources where the law upholds a freedom to communicate anonymously through the media A separate chapter looks at anonymous Internet communication particularly on social media and analyses the difficulties faced by the victims of threats and defamatory allegations on the Net when the speaker has used a pseudonym In its final chapter the book compares the universally accepted argument for the secret ballot with the more controversial case for anonymous speech This is the first comprehensive study of anonymous speech to examine critically the arguments for and against anonymity These arguments were vigorously canvassed in the nineteenth century largely in the context of literary reviewing and are now of enormous importance for communication on the Internet   **Information and Communication Technologies** Santiago Berrezueta-Guzman,Rommel Torres,Jorge Luis Zambrano-Martinez,Jorge Herrera-Tapia,2024-10-28 This book constitutes the refereed proceedings of the 12th Ecuadorian Conference on Information and Communication Technologies TICEC 2024 held in Loja Ecuador during October 16 18 2024 The 24 full papers presented here were carefully reviewed and selected from 74 submissions They were organized in the following topical sections Image Processing Classification and Segmentation Artificial Intelligence and Machine Learning Applications IoT Embedded Systems and Applications in Healthcare and Industrial Environments   *IIMA - Business And Intellectual Property* Anurag K Agarwal,2016-10-25 Business and Intellectual Property reflects on the future of IP in the age of new media and shows how in a rapidly changing business field managers and decision makers need to be more perceptive agile and vigilant than ever

before Drawing on contemporary business affairs and strategies it explores the nature and scope of IP and the evolution of national laws and global agreements like the TRIPs to protect it It also explores the measures the use of patents copyrights and trademarks used by some of the biggest brands Coke MGM 20th Century Fox Microsoft Harrods Maruti Tata to manage disputes and protect themselves **Artificial General Intelligence (AGI) and the Image of God** Peter J. Bellini,2023-09-19 Can artificial intelligence AI attain human level consciousness And if so should the church minister salvation to AI Through engaging philosophy of mind AI research the cognitive sciences neuroscience and theological anthropology Dr Bellini attempts to answer these questions The hypothesis is if the hard problem of consciousness can be solved and if human consciousness is replicable in AI then attaining artificial general conscious intelligence AGCI is possible and perhaps needs to be evangelized or discipled as some claim On the contrary if the hard problem of consciousness cannot be solved and human consciousness is not replicable in AI then AGCI is not possible and it does not need to be evangelized And in either case how can the church begin a theological conversation with AI with its potential to match and exceed human intelligence and performance A theological position on consciousness and the image of God is proposed demonstrating the uniqueness of human consciousness in contrast with AI and artificial consciousness A thorough exposition of the image of God is offered to serve as a cornerstone for any future conversation on a theological perspective of machines AI
