Unreliable Csaba Szabo, 2025-03-11 Reproducibility is fundamental to the scientific method After reading a paper describing research findings a scientist should be able to repeat the experiment and obtain the same results Yet an alarming number perhaps as high as 90 percent of published biomedical research papers face challenges in independent replication Such issues range from honest mistakes to outright fraud The scope of this crisis however underscores deeper systemic issues within the scientific community its culture incentives and institutions In *Unreliable* the distinguished scientist Csaba Szabo examines the causes and consequences of the reproducibility crisis in biomedical research showing why the factors that encourage misconduct stem from flaws in real world science There are many culprits including commonplace research methods and dubious statistical techniques Academic career incentives hypercompetition for grant funding and a bias toward publishing positive results have exacerbated the problem Deliberate data manipulation and fabricated findings churned out by paper mills are disturbingly common Academic institutions and publishers for their part have perpetuated a culture of impunity Szabo explores how these failures have hindered scientific progress and impeded the development of new treatments and he introduces readers to the science sleuths who tirelessly uncover misconduct He proposes comprehensive reforms from scientific training to the grant system through the publication process to address the root causes of the crisis Written in clear language and leavened with a keen sense of irony *Unreliable* is an essential account of the reproducibility crisis that gives readers an inside look at how science is actually done

The Dark Side of Speech Carlo Penco, 2024-10-08 What is disinformation and why does it matter How can we understand and detect different kinds of disinformation With an analysis of relevant events of the period 2012-2022 the book attempts to answer these questions The book is organized into four parts 1 The first part presents the notions of post truth and fake news using some of the most recent critical studies analyzing some typical examples and the environment in which some of them originated 2 The second part introduces the notion of conspiracy theory and describes the emergence of the idea of white supremacy and its ramifications together with the narratives developed during the COVID restrictions 3 The third part describes the emergence of the algorithms behind social networks and their role in propaganda making examples of US and European elections and the Brexit referendum An analysis of Cambridge Analytica shows the tip of an iceberg of disinformation that is spreading around the world Some remarks by comedians and philosophers help to give a new view on the concept of freedom of speech

with particular attention to the more and more difficult freedom of the press 4 The fourth part gives some emergency tools for detecting disinformation at an individual level understanding the most hidden mechanisms of disinformation and the biases that almost unavoidably enter our minds These tools come from the results both of traditional theories and the most recent social philosophy of language not despising references to statistics This is a fundamental book for having a general survey of this period of political turmoil consulting a wide list of references and official documents and having a grasp of the means of intellectual self defense This book is non standard it relies on the most sophisticated theories of language and yet it gives everything in simple and colloquial language Differently from sophisticated analyses of linguistic phenomena it gives the feeling of participating in a tour around what happened in the last decade with a disenchanted eye that uses some results of the critical literature without compelling one to become a theoretician in the field of philosophy or critical analysis The hidden focus of the book is freedom of speech and freedom of thought and what they mean today in an era of more

sophisticated and widespread disinformation permitted by the algorithms governing social networks *Don't Lie to Me* Jeanine Pirro, 2020-09-22 Judge Jeanine Pirro author of two New York Times bestsellers exposes the lies and distortions of the president's enemies It's been nearly four years since President Trump took office and Judge Jeanine Pirro has had enough of the left's countless lies and false accusations She is now forced to ask How could anyone vote against President Trump this November What more could you possibly want In *Don't Lie to Me* Judge Jeanine brings her signature writing style and acute legal mind to topics such as the impeachment inquiry the military and the road to the 2020 presidential election She will highlight President Trump's triumphs and his strength during the coronavirus crisis **Wes Anderson's Symbolic**
