SP026: Traveling America's loneliest road: A geologic and natural history tour through Nevada along U.S. Highway 50, with GPS coordinates Kris Ann Pizarro,2010 G-Force: Flying the World's Greatest Aircraft James Bennet,2016-10 Read what military pilots have to say about flying some of the most incredible fighting aircraft ever built It s like a 20 million strap on carnival ride AH 64 Apache Pilot I had high expectations and it s beat eery one of those The whole jet is awesome F A 18F Super Hornet pilot The role of the pilot has changed hugely in the last sixty years of military aviation Jet pilots in the 1960s flying types such as the Harrier and F 102 would have spent a huge portion of their concentration just keeping the aircraft under control That left little spare mental capacity to locate and engage the enemy Today the opposite is true Computers have made flying so simple that it is now considered very easy to fly the SAAB Gripen or Lockheed Martin F 35 Lightning II allowing the pilot to focus fully on his or her mission G Force Flying the World s Greatest Aircraft is a celebration of the experience of flying some of aviation s most spectacular powerful and

dangerous machines from early jet fighters such as the F 86 Sabre and MiG 15 to today's F 22 Raptor and Eurofighter Typhoon Packed with first hand interviews with test and combat pilots from the world's air forces and illustrated with extensively researched and striking imagery G Force Flying the World's Greatest Aircraft is a thrilling ride alongside the pilots who fly the aircraft every day Featuring first hand accounts of combat over Korea in the MiG 15 endurance missions in the B 2 and bombing Iraqi targets in the Tornado this book puts the reader directly in the pilot's seat and will appeal to aviation enthusiasts of all ages

The History of Western Palearctic Falcons Giovanni Leonardi, 2025-04-22 Falcons have been exploited by humans as food source ornamental purposes or for the falconry practices There is a large historical literature in which falcons were often mentioned but always along broader topics mainly ancient falconry and poetry This book is the result of a parallel project developed during the preparation of Behavioral Ecology of Western Palearctic falcons published by Springer in 2020 The main aim is to use archaeological and historical sources on falcons to delineate the past distribution and population ecology of these predators in the Western Palearctic ecozone Ultimately the approach to the data is aimed at defining the population dynamics of falcons over time The relationship conflict with human populations is also placed in this context By putting falcons as a central subject of study this book outlines their path in the Western Palearctic from the Pleistocene to modern ornithology

Analysis of G/LEO Kinetic Bombardment and Application to National Security Strategies for Full-Spectrum Military Interoperability Ramsey Elbasheer, 2014-05-01 The objective of this study centralized on the analysis of a kinetic bombardment long rod penetrator system and its evident processes ramifications and applications Applications spanned three broad operational intentions deep bunker breach intercontinental strike capability and preeminence over terrestrial forces without matched investment The ambition of a viable Kinetic Bombardment Orbital Mechanism KBOM is for the cost in its entirety from being put into orbit to maintenance and ejecting payloads to be less than or equal to the same amount of marginal effort required to build maintain and launch the required number of ICBMs to complete a given set of tactical objectives Eleven potential Kinetic Bombardment Rod KBR configurations were initially developed varying between two forms standard tungsten carbide rods and tungsten carbide rods equipped with thermobaric warheads Through an Analysis of Alternatives AoA down select process a final standard tungsten carbide rod composition was selected for use as a case example for further investigation It is concluded that as policies are shaped to allow less restricted military activity in space kinetic bombardment systems will be acquired in response to distinct international events or threats Peer nations seeking to

match U S general terrestrial forces without matching U S investment may also look to acquire orbital defense satellites In regards to nations such as the United States that already own weapons effective against all classes of targets kinetic bombardment systems will only become viable prospects once launch costs decline with the development of reusable launch vehicles This study makes the beginning but surely not the whole case for the long pursued concept of orbital defense satellites as the obstacles that once stood in the way recede While it does not however suggest or constitute the immediate development of such a project it perhaps constitutes its future consideration

Behavioural Ecology of Western Palearctic Falcons Giovanni Leonardi, 2020-12-07 This monograph is the result of eight years of bibliographical and field research concerning several behavioural ecology aspects of the Palearctic falcons For a while this book grew along with The Lanner falcon published in 2015 and revised in 2017 In both books the main aim was to provide a clear overview of the biology and ecology of these species In fact in the last 20 years the number of publications on falcons has grown tremendously and in parallel also those belonging to the so called grey literature The number of people involved is also increased by including both academics and nature lovers Many previously published books emphasized identification and offered little insights on the behavioural and ecological aspects of the species Very often the research on behavioural ecology remains closed within the confines of academic community By contrast a multitude of basic data is scattered in countless articles published in local magazines Many falcon species are easy to observe and study such as kestrels but others are more rare and localized In order to understand the survival strategies adopted by this group of avian predators it is necessary not to lose sight of the overall picture This book tries to explain the different survival strategies by examining through a few essential chapters some crucial aspects for all species The first chapter provides information on the genus *Falco* its genetics evolution and morphological peculiarities The other chapters deal with reproductive strategies competition exploitation of resources dispersal patterns communication and sociality One of the main objectives of this book is to produce an accessible but scholarly curated source of reference By understanding the most common species it is possible to provide a working framework for rarer and especially threatened falcon species
