A Rights-Based Preventative Approach for Psychosocial Well-being in Childhood Murli Desai, 2010-09-02 Children are one of the most important phases of human development and the most important target group for social work intervention. Most of the schools of human development and social work around the world have an elective course on children and some offer a concentration in this area. There are plenty of textbooks on intervention with children published by Western authors focusing on useful theories and skills but mainly at the remedial level. They neither use the preventative approach nor the child rights perspective which has been found useful in the developing nations. The books on child rights are generally published by the United Nations Children's Fund UNICEF and other international organisations working in the field of children such as Save the Children. These books focus on the useful child rights perspective but they neither integrate theories nor use the preventative approach. The proposed book, *A Rights based Preventative Approach for Children's Psychosocial Well Being*, will be the first to apply the child rights perspective and the preventative approach to intervention for children's psychosocial well being. It is an integration of theories with practice and teaching relevant in different parts of the world. The book is divided into the following three parts: Part 1 Introduction to a Rights based Preventative Approach for Children's Psychosocial Well Being; Part 2 Primary Prevention for Children's Psychosocial Well Being; Part 3 Secondary and Tertiary Prevention for Children's Psychosocial Well Being.
