The GATB is published in association with Human Resources Development Canada, and is based on 1986 Canadian Norms.

Nelson Education also offers a GATB Certification Course (see page 39).

The GATB is used extensively in Canada in vocational counselling, rehabilitation and occupational selection settings. The GATB profile of occupational aptitudes can be used to determine appropriate career and/or training paths.

GATB measures the following nine distinct aptitudes, based on 12 separate parts of the battery: eight paper-and-pencil tests, and four performance tests.

G – General Learning Ability	V – Verbal Aptitude
N – Numerical Aptitude	S – Spatial Aptitude
P – Form Perception	C – Clerical Perception
K – Motor Co-ordination	F – Finger Dexterity
M – Manual Dexterity	

GATB test results assist counsellors in matching aptitude levels that correspond to the National Occupational Classification (NOC) Career Handbook.

GATB can be used in conjunction with the interest tests such as the Canadian Work Preference Inventory (CWPI), to assist in determining appropriate career paths. (The CWPI is available through Multi Health Systems Inc.)

The GATB Application and Interpretation Manual replaces an earlier publication "Using Tests in Employment Counselling." The newer manual is used in the GATB Certification Course and is a valuable resource to review the GATB.

## Getting Started with the GATB

For examiners who are using the GATB for the first time, please consider the GATB Examination Kit listed near the end of the table below. This kit contains all of the necessary materials to test two clients on the

paper-and-pencil portions of the battery (Parts 1 through 8), and to score the tests. After becoming familiar with the GATB, if you wish to test with Parts 9 through 12, purchase a Pegboard ("manual dexterity board") and a Finger Dexterity Board.

## Components and Prices for GATB

GATB consists of 12 parts – some components are related to the administration and scoring of specific parts. Most examiners use GATB Form A.
