Kiefer,2012-12-06 In almost all principled accounts of questions questions are related to the corresponding answers Zellig Harris Harris 1978 1 for example maintains that all interrogative sentences can be derived by means of the independently established transformations of the language from sentences which assert that someone is asking about a disjunction of statements which are the relevant possible answers to that interrogative This amounts to the claim that a yes no question such as Will John stay is derived from I ask you whether John will stay and a wh question such as Who came is derived from something like I ask you whether A came or B came or or X came Though in generative grammar interrogatives are not derived from the corresponding declaratives the semantic interpretation of questions is akin to the syntactic source of questions posited by Harris Jerrold J Katz and Paul M Postal Katz Postal 1964 113 117 state a reading rule for Q the interrogative constituent which boils down to 1 in the case of yes no questions and to 2 in the case of wh questions 1 Tell me which of the following is true John will stay or John will not stay 2 Tell me which of the following is true A came or B came or or X came Thus the semantic interpretation of questions makes reference to the set of possible answers represented here by a disjunction of statements *Expert Systems for Human, Materials and Automation* Petrică Vizureanu,2011-10-10 The ability to create intelligent machines has intrigued humans since ancient times and today with the advent of the computer and 50 years of research into AI programming techniques the dream of smart machines is becoming a reality The concept of human computer interfaces has been undergoing changes over the years In carrying out the most important tasks is the lack of formalized application methods mathematical models and advanced computer support The evolution of biological systems to adapt to their environment has fascinated and challenged scientists to increase their level of understanding of the functional characteristics of such systems This book has 19 chapters and explain that the expert systems are products of the artificial intelligence branch of computer science that seeks to develop intelligent programs for human materials and automation 273 technical questions and answers for job interview *Offshore Oil & Gas Platforms* Petrogav International Oil & Gas Training Center,2020-06-29 The job interview is probably the most important step you will take in your job search journey Because it s always important to be prepared to respond effectively to the questions that employers typically ask at a job interview Petrogav International has prepared this eBooks that will help you to get a job in oil and gas industry Since these questions are so common hiring managers will expect you to be able to answer them smoothly and without hesitation This eBook contains 273 questions and answers for job interview and as a BONUS web addresses to 218 video movies for a better understanding of the technological process This course covers aspects like HSE Process Mechanical Electrical and Instrumentation Control that will enable you to apply for any position in the Oil and Gas Industry *PC Mag* ,1988-01-12
