Asymmetric Crisis in Europe and Possible Futures Johannes Jäger, Elisabeth Springler, 2015-04-10 The crisis in Europe is often discussed as a crisis of European integration or a crisis of national economies within Europe Both the methodological Europeanism and methodological nationalism miss out the important links between economic and political processes at different spatial scales within Europe and therefore asymmetries and phenomena of uneven development In addition a discussion of possible scenarios which systematically addresses the implications of anti crisis policies is missing This volume seeks to close this gap by systematically integrating the analysis of economic policy or technical solutions to the crisis within a broader framework of political economy It argues that combining critical political economy approaches and post Keynesian perspectives allows for a systematic understanding of the economic and political dimensions of the crisis Although both approaches have the capacity to deal with asymmetries and uneven development the heterogeneity in Europe has been an often largely neglected dimension of analysis However this recent crisis has shown that this is an essential dimension which has to be addressed in order to better understand the dynamics of European development and integration Hence this book aims to deal with asymmetries in Europe and to bridge the gap between the two perspectives This work will initiate an integrative debate that is crucial for a deeper understanding of the current crisis and is an important resource for all students and scholars of IPE European political economy and European politics *Taken For A Ride* Matteo

Excluded Richard D Kahlenberg,2023-07-11 An indictment of America s housing policy that reveals the social engineering underlying our segregation by economic class the social and political fallout that result and what we can do about it The last acceptable form of prejudice in America is based on class and executed through state sponsored economic discrimination which is hard to see because it is much more subtle than raw racism While the American meritocracy officially denounces prejudice based on race and gender it has spawned a new form of bias against those with less education and income Millions of working class Americans have their opportunity

blocked by exclusionary snob zoning These government policies make housing unaffordable frustrate the goals of the civil rights movement and lock in inequality in our urban and suburban landscapes Through moving accounts of families excluded from economic and social opportunity as they are hemmed in through new redlining that limits the type of housing that can be built Richard Kahlenberg vividly illustrates why America has a housing crisis He also illustrates why economic segregation matters since where you live affects access to transportation employment opportunities decent health care and good schools He shows that housing choice has been socially engineered to the benefit of the affluent and that astonishingly the most restrictive zoning is found in politically liberal cities where racial views are more progressive Despite this there is hope Kahlenberg tells the inspiring stories of growing number of local and national movements working to tear down the walls that inflicts so much damage on the lives of millions of Americans

An Endogenous Theory of Property Rights Peter Ho, 2018-10-15 From a neo liberal neo classical paradigm secure formal and private property rights are crucial to fostering sustained development Institutions that fail to respond to shifting socio economic opportunities are thus forced to make new arrangements The enigma is posed by developments on the ground Why would the removal of authoritarian institutions during the Arab Spring or Iraq War not increase market efficiency but rather cause the reverse while China and India despite persisting insecure informal and common institutions featured sustained growth This collection posits that understanding these paradoxes requires a refocusing from form to function detached from normative assumptions about institutional appearance In so doing three things are accomplished First starting from case studies on land it is ascertained that the argument can be meaningfully extended to labour capital and beyond Second the argument validates the Credibility Thesis that is once institutions persist they fulfil a function Third the collection studies development broadly construed by including the modes of production and beyond the rural and urban the developed and developing This is why it reviews property rights from China and India to Turkey Mexico and Malaysia

covering issues such as customary rights and privatization mining and pastoralism dam building and irrigation but also state owned banks trade unions and notaries This book was originally published as a special issue of The Journal of Peasant Studies

An Archaeology of Structural Violence Michael P. Roller, 2018-10-17 Brilliantly underscores how the manifestations of modern alienation and social inequality must be at the center of any truly anthropological analysis in the twenty first century This fantastic volume makes us comprehend the immense complexities of violent modernity and will compel us to critically interrogate our past our present and our future Daniel O Sayers author of *A Desolate Place for a Defiant People* The Archaeology of Maroons Indigenous Americans and Enslaved Laborers in the Great Dismal Swamp Drawing on material evidence from daily life in a coal mining town this book offers an up close view of the political economy of the United States over the course of the twentieth century This community s story illustrates the great ironies of this era showing how modernist progress and plenty were inseparable from the destructive cycles of capitalism At the heart of this book is one of the bloodiest yet least known acts of labor violence in American history the 1897 Lattimer Massacre in which 19 striking immigrant mineworkers were killed and 40 more were injured Michael Roller looks beneath this moment of outright violence at the everyday material and spatial conditions that supported it pointing to the growth of shanty enclaves on the periphery of the town that reveal the reliance of coal companies on immigrant surplus labor Roller then documents the changing landscape of the region after the event as the anthracite coal industry declined as well as community redevelopment efforts in the late twentieth century This rare sustained geographical focus and long historical view illuminates the rise of soft forms of power and violence over workers citizens and consumers between the late 1800s and the present day Roller expertly blends archaeology labor history ethnography and critical social theory to demonstrate how the archaeology of the recent past can uncover the deep foundations of today s social troubles Michael P Roller is a research affiliate of the Anthropology Department of the University of Maryland Currently he is employed as an archaeologist for the National Park Service A volume in the series Cultural Heritage Studies edited by Paul A Shackel
