

- the brachiocephalic,
- left common carotid and the
- left subclavian.

The majority of the time, these vessels are not visible because the aorta was cut too close to the main part of the heart when the heart was removed from the animal.

#### Step 4: Make the Incisions

Now that you have all of the vessels located and marked, you can now open the heart to view the inner chambers. Use the **superior vena cava** and **pulmonary vein** as guides for where to cut. You are basically going to be cutting each side of the heart so that you can look inside. The heart below is marked to show you where the two incisions should be made.

#### Step 5: Viewing the Chambers

At this point it is helpful to have two hands, one to hold the heart apart so you can take a peak inside of it and another to use a probe to locate the specific parts. Your colour pencils you used to mark the heart in step 2 can also now be used to see where those vessels connect within the
