Student Debt William Elliott III, Melinda K. Lewis, 2017-01-26 Offering answers to essential questions about student debt and many connected issues this book examines student debt in the United States at every stage of the process from the banks that issue the loans to the colleges and universities that collect the payments Student lending in the United States is one of the most controversial issues in contemporary American discourse Are these loans the only option for Americans who want to attend college and university in order to attain the best careers and have a productive enjoyable life Should the predatory lending practices of for profit colleges and universities be stopped How can limits be imposed on student lending amounts without preventing students from getting the education they need to succeed The book explains why so many students are borrowing large amounts of money to attend college considers whether the cost of higher education is simply too high and if there should be a

cap on how much money students can borrow explains what is contributing to the rising rate of borrowers defaulting on their loans and predicts whether the so called student loan bubble is in danger of popping The Data and Documents chapter analyzes data gathered from discussions about student debt This information enables readers to better understand who is borrowing student loans what the money from the student loans is going toward what individuals have the authority to decide who qualifies for these loans and what is being done to curb wasteful student spending *Finding Time* Heather

Boushey,2016-04-19 Employers demand more of employees time while leaving the important things in life health family for workers to take care of on their own time and dime How can workers get ahead while making sure their families don t fall behind Heather Boushey shows in detail that economic efficiency and equity do not have to be enemies **Prosperity in**

Rural Africa? Dan Brockington,Christine Noe,2021-09-16 How can we track change in poor rural areas where data are scarce How do we know what general economic growth does to places which are considered rural backwaters As poorer countries try to transform their economies and as economies appear to be rebounding across Africa what is that doing to the rural poor Prosperity in Rural Africa provides surprising and challenging answers to these questions It brings together the expertise of a collection of researchers with decades of experience of working in Tanzania all of whom faced a deceptively simple task go back to your study sites to the places you know well and to the families you first visited and then describe and try to explain the changes that you see The result is a fascinating compilation of insights and experience into the dynamics of rural societies in Tanzania which highlights the importance of investment in assets for rural peoples and their success in doing so largely through their endeavours in small holder farming Assets are centrally important to local definitions of wealth across the country This matters a great deal because rural people s investment in assets is not counted when poverty lines are calculated There are sound methodological reasons for this omission But it means that when rural people invest in assets then that growing prosperity is invisible in development data This book shows what those data can miss This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations Strategising Energy: An Asian

Perspective ,2014-01-15 As energy has become one of the crucial factors in ensuring the economic growth and the sustainable development of people nations societies and ultimately human civilisation in the 21st century global scenario there is a pressing need for treating energy as a strategic commodity and for analysing national regional and global strategies concerning energy This is an attempt to debate and discuss various facets economic technological and political of such strategies and at the same time to encompass concepts like energy security and energy diplomacy that form significant components of such strategies Strategising of energy is an issue that is inextricably linked with the domestic and foreign policies of a nation or a region and it is characteristically futuristic as strategies are supposed to be made with a long term perspective Contemporary Asian realities serve as the perspective of such an analysis for several reasons Asia is the home of

two fast growing and energy thirsty countries like China and India as well as Japan and the ASEAN countries There are at least three energy producing regions in Asia that are crucial for global energy security like West Asia the traditional one two upcoming regions of Central Asia and the area around South China Sea The Indian Ocean is one of the most important energy transit routes for international energy transport Even the smallest disruption in the production and transport chain of energy within Asia has the potential of upsetting the global energy balance This volume attempts to focus on a number of significant issues concerning the theme of strategising of energy Contributors analyse debate and discuss the questions from different viewpoints and different angles Thus this volume represents a wide spectrum of views from a scientist s vision of a world with cleaner energy to the strategist s comments on solutions to national energy issues from journalists views on the development of governmental policies on energy to academicians analyses of regional energy strategies and from historians analyses of the restructuring of the national energy infrastructure and the re prioritising of national energy strategies to debates on national regional as well as maritime energy strategies by specialists on international relations

The Economics of Gender Equality in the Labour Market Meltem İnce Yenilmez,Gül Ş. Huyugüzel Kışla,2021-03-07 This book evaluates the global labour market in the context of gender equality and the associated policies and regulations particularly in developing markets to recommend measures for encouraging gender equality It exposes the barriers that women employees encounter as well as some of the societal and workplace policies they specifically are subject to Important themes within this topic include participation rates the looming gap in hourly pay availability of part time and full time positions value and social status associated with jobs held by men and women The book examines how global gender policy objectives such as gender equality in careers gender balance in decision making and gender dimensions in research can be incorporated into policy frameworks The book analyzes the gendered nature of assumptions processes and theories The juxtaposition between family and work tradition and modernity and dependency and autonomy clearly still seems to be misunderstood Therefore the book asks whether work improves women s positions in society and or changes their roles in their families The authors explore and uncover the connections among employment entrepreneurship migration economies and gender global labour markets and provide helpful solutions to the perceptions surrounding women s status risks and inequality that limit their economic participation This insightful read provides comprehensive details on a variety of themes and encourages further research on

policies that are key to promoting gender equality The book will appeal to postgraduate students and researchers of labour and feminist economics the economics of gender women s studies and sociology *Cobbett's Parliamentary Debates* ,1885
