**Reforming Legislatures** Peverill Squire,2024-06-26 Winner of the 2025 Virginia Gray Book Award APSA Section 22 State Politics and Policy Legislatures are ubiquitous in the American political experience First created in Virginia in 1619 they have existed continuously ever since Indeed they were established in even the most unlikely of places notably in sparsely populated frontier settlements and functioned as the focal point of every governing system devised Despite the ubiquity of state legislatures we know remarkably little about how Americans have viewed them as organizations in terms of their structures rules and procedures But with the rise of modern public opinion surveys in the twentieth century we now have extensive data on how Americans have gauged legislative performance throughout the many years That said the responses to the questions pollsters typically pose reflect partisanship policy and personality Generally respondents respond favorably to legislatures controlled by their own political party and those in power during good economic times Incumbent lawmakers get ratings boosts from having personalities home styles that mesh with those of their constituents These relationships are important indicators of people s thoughts regarding the current performance of their legislatures and legislators but they tell us nothing about attitudes

toward the institution and its organizational characteristics This study offers a unique perspective on what American voters have historically thought about legislatures as organizations and legislators as representatives Rather than focusing on responses to surveys that ask respondents how they rate the current performance of lawmakers and legislatures this study leverages the most significant difference between national and state politics the existence of ballot propositions in the latter At the national level Americans have never had any say over Congress's structure rules or procedures In contrast at the state level they have had ample opportunities over the course of more than two centuries to shape their state legislatures The data examined here look at how people have voted on more than 1 500 state ballot propositions targeting a wide array of legislative organizational and parliamentary features By linking the votes on these measures with the public debates preceding them this study documents not only how Americans viewed various aspects of their legislatures but also whether their opinions held constant or shifted over time The findings reported paint a more nuanced picture of Americans attitudes toward legislatures than the prevailing one derived from survey research When presented with legislative reform measures on which concrete choices were offered and decisions on them had to be made the analyses presented here reveal that counter to the conventional wisdom that people loved their representatives but hated the legislature voters usually took charitable positions toward the institution while harboring skeptical attitudes about lawmakers motives and behaviors

Miller,2020-07-14 Texas and California are the leaders of Red and Blue America As the nation has polarized its most populous and economically powerful states have taken charge of the opposing camps These states now advance sharply contrasting political and policy agendas and view themselves as competitors for control of the nation's future Kenneth P Miller provides a detailed account of the rivalry's emergence present state and possible future First he explores why despite their many similarities the two states have become so deeply divided As he shows they experienced critical differences in their origins and in their later demographic economic cultural and political development Second he describes how Texas and California have constructed opposing comprehensive policy models one conservative the other progressive Miller highlights the states contrasting policies in five areas tax labor energy and environment poverty and social issues and also shows how Texas and California have led the red and blue state blocs in seeking to influence federal policy in these areas The book concludes by assessing two models strengths vulnerabilities and future prospects The rivalry between the two states will likely continue for the foreseeable future because California will surely stay blue and Texas will likely remain red The challenge for the two states and for the nation as a whole is to view the competition in a positive light and turn it to productive ends Exploring one of the primary rifts in American politics Texas vs California sheds light on virtually every aspect of the country's political system      Green Guide for Artists Karen Michel,2009-06-01 The Green Guide for Artists inspires artists to make better eco conscious choices within their work and their studios and shows them how The book has four sections The first contains recipes for DIY art supplies such as ones for mixing your own non toxic paints and adhesives and making your own papers from recycled paper The second offers safe and green practices for the workspace The next section shares a fresh look at using recycled materials through creative step by step projects and a gallery section The final section contains a resource guide for eco friendly materials and supplies including websites and forum links      **The Failed Promise of Sentencing Reform** Michael O'Hear,2017-03-20 Despite 15 years of reform efforts the incarceration rate in the United States remains unprecedentedly high This book provides the first comprehensive survey of these reforms and explains why they have proven to be ineffective After many decades of stability the imprisonment rate in the United States quintupled between 1973 and 2003 Since then nearly all states have adopted multiple reforms intended to reduce imprisonment but the U S imprisonment rate has only decreased by a paltry 2 percent

Why have American sentencing reforms since 2000 been largely ineffective Are tough mandatory minimum sentences for nonviolent drug offenders the primary reason our prisons are always full This book offers a fascinating assessment of the wave of sentencing reforms adopted by dozens of states as well as changes at the federal level since 2000 identifying common themes among seemingly disparate changes in sentencing policy and highlighting recent reform efforts that have been more successful and may point the way forward for the nation as a whole In *The Failed Promise of Sentencing Reform* Michael O Hear exposes the myths that American prison sentencing reforms enacted in the 21st century have failed to have the expected effect because U S prisons are filled to capacity with nonviolent drug offenders as a result of the war on drugs or because of new laws that took away the discretion of judges and corrections officials O Hear then makes a convincing case for the real reasons sentencing reforms have come up short because they exclude violent and sexual offenders and because they rely on the discretion of officials who still have every incentive to be highly risk averse He also highlights how overlooking the well being of offenders and their families in our consideration of sentencing reform has undermined efforts to effect real change
