History Of Psychology 4th Edition David Hothersall:

Psychology, Fourth Edition Peter O. Gray, 2002 The new edition of Gray's acclaimed text featuring dramatic new coverage of sensation and perception and new media tools that actively involve students in psychological research **The Perils of Human Exceptionalism** Dennis L. Durst, 2022-07-18 Over the course of the nineteenth century transatlantic intellectuals slowly revised theological anthropology or the doctrine of humanity seen in light of the divine. Gradually elite discourse deposed humanity from its lofty estate and centering it within a naturalistic account wherein likeness to animal fauna became the central evaluative lens. Durst argues that theological anthropologies across the disciplines increasingly shifted focus away from classic confessional themes such as the soul and the image of God and toward the methods of natural theology and intuitionism. This occurred in the form of challenges to theology in biology, phrenology, transcendentalism, anti-theology, Christian socialism, intuitionism, and religious experience. The human soul and human sinfulness also found a revised articulation in terms increasingly shaped by the cultural authority of science. An ascendant subjective approach to human nature emerged whereby religious experiences, not theological claims to truth, assumed prominence as the central measures of religious life. **Mass Communication Theories** Melvin L. DeFleur, Margaret H. DeFleur, 2022-05-02 The second edition of this innovative textbook provides a comprehensive overview of mass communication theories as well as their origins and empirical supports in psychology, sociology, political science, and philosophy. Each chapter presents a specific theory describing its basic structure in simple formal terms and providing an accessible summary of the research studies and scholarly writings from which it developed. It breaks each complex theory down into five or six interlinked basic propositions, making them easily digestible for students. This new edition includes up-to-date research, improved coverage of all theories presented, expanded treatments of theories such as cultivation theory, the spiral of silence, and framing, contemporary and social media examples, chapter discussion questions, and informative charts and figures. This textbook serves as an accessible core text for undergraduate and graduate Mass Communication, Communication Theory, and Communication and Society courses. *Science and Technology in World History* James E. McClellan III, Harold Dorn, 2006-06-20 The new edition reorganizes its treatment of Greek science and significantly expands its coverage of industrial civilization and contemporary science and technology with new and revised chapters devoted to applied science, the sociology and economics of science, globalization, and the technological systems that underpin everyday life. What is Psychology? Andrew Colman, 2016-01-28 This clear and lively introduction to psychology assumes no prior knowledge of the subject. Extensively revised and updated, this third edition describes psychology as it is taught at universities. Examples are used throughout to illustrate fundamental ideas, with a self-assessment quiz focusing readers' minds on a number of intriguing psychological problems. The differences between psychology, psychiatry, and psychoanalysis are explained, and the professions and careers associated with psychology are explored. Suggestions for further reading and useful internet sites are included. **Indexing Specialties** Becky

Hornyak,2002 Continuing the series that addresses specialized areas for indexers Becky Hornyak has assembled a panel of experts that includes Sandy Topping Carolyn Weaver and Carol Schoun The emphasis is on indexing textbooks and books aimed at clinical practitioners in the field of psychology Included are extensive annotated listings of print and online resources for psychology indexers What is Psychology?
