History Gr11 Paper 1 Nov 2013:

Narrating the Soviet Era in Russian School History Textbooks Olga Konkka, 2025-09-03 This study focuses on how Russian history textbooks published between 1992 and 2021 dealt with the topic of the Soviet period 1917-1991. Representations of this part of Russia's past in school manuals have provoked vivid debates and bolstered government intervention in the field while a gradual shift towards a less critical narrative of the USSR in more recent textbooks is often presented as directed by Vladimir Putin. This study combines research into these texts and inquiry into those who write, publish, approve or criticize them. Bringing together these perspectives provides a more complex view of school textbooks as final products of both top-down and bottom-up processes. This volume is aimed at postgraduate researchers and academics specializing in Soviet history, contemporary Russian politics and society and history education and textbooks.

A Monetary and Fiscal History of Latin America, 1960-2017 Timothy J. Kehoe, Juan Pablo Nicolini, 2022-01-11 A major new and comprehensive look at six decades of macroeconomic policies across the region. What went wrong with the economic development of Latin America over the past half century? Along with periods of poor economic performance, the region's countries have been plagued by a wide variety of economic crises. This major new work brings together dozens of leading economists to explore the economic performance of the ten largest countries in South America and of Mexico. Together they advance the fundamental hypothesis that despite different manifestations, these crises all have been the result of poorly designed or poorly implemented fiscal and monetary policies. Each country is treated in its own section of the book with a lead chapter presenting a comprehensive database of the country's fiscal, monetary and economic data from 1960 to 2017. The chapters are drawn from one-day academic conferences hosted in all but one case in the focus country with participants including noted economists and former leading policy makers. Cowritten with Nobel Prize winner Thomas J. Sargent, the editors' introduction provides a conceptual framework for analyzing fiscal and monetary policy in countries around the world, particularly those less developed. A final chapter draws conclusions and suggests directions for further research. A vital resource for advanced undergraduate and graduate students of economics and for economic researchers and policy makers.

A Monetary and Fiscal History of Latin America 1960-2017 goes further than any book in stressing both the singularities and the similarities of the economic histories of Latin America's largest countries. Burnt by Democracy Jacqueline Kennelly, 2023-11-30 *Burnt by Democracy* traces the political ascendance of neoliberalism and its effects on youth. The book explores democracy and citizenship as described in interviews with over forty young people ages 16 to 30 who have either experienced homelessness or identify as an activist living in five liberal democracies: Canada, Australia, New Zealand, the United States, and the United Kingdom. Highlighting significant cuts to social and affordable housing, astronomical increases in the costs of higher education, and the transformation and erosion of state benefits systems, Jacqueline Kennelly argues that democracy's decline is not occurring because young people are apathetic or focused on informal politics or unaware of their civic duties. Rather, it is because of collective misunderstanding about how democracy is actually structured, how individuals learn to participate, and how growing wealth inequality has undermined the capacity of those at the bottom to meaningfully advocate for changes that might improve their conditions. Against a vivid and often heart-breaking backdrop of stories from young people struggling to survive and thrive under conditions of ever-expanding state retrenchment and inequality, *Burnt by Democracy* makes a timely and impassioned plea for protecting and strengthening democracy by truly levelling the playing field for all.

Multicultural Curriculum Transformation in Social Studies and Civic Education Kenneth J. Fasching-Varner, Kerri J. Tobin, Norma A. Marrun, Iesha Jackson, Christine Clark, 2021-07-12 This book focuses on multicultural curriculum transformation in social studies and civic education subject areas. The discussion of each area outlines critical considerations for multicultural curriculum transformation for the area by grade level and then by eight organizing tools including content standards, relationships with and among students and their families, and evaluation of student learning and teaching effectiveness. The volume is designed to speak with PK-12 teachers as colleagues in the multicultural curriculum transformation work. Readers are exposed to things to think about but also given curricular examples to work with or from in going about the actual concrete work of curriculum change. This work supports PK-12 teachers to independently multiculturally adapt existing curriculum to create new multicultural curriculum differentiated by content areas and grade levels and by providing ample examples of what such multicultural transformed social studies and civic education curricula look like in practice.

Founding Myths Ray Raphael, 2014-07-04 First published ten years ago, award-winning historian Ray Raphael's *Founding Myths* has since established itself as a landmark of historical myth-busting. With the author's trademark wit and flair, *Founding Myths* exposes the errors and inventions in

America's most cherished tales from Paul Revere's famous ride to Patrick Henry's Liberty or Death speech. For the seventy thousand readers who have been captivated by Raphael's eye-opening accounts, history has never been the same. In this revised tenth anniversary edition, Raphael revisits the original myths and explores their further evolution over the past decade, uncovering new stories and peeling back additional layers of misinformation. This new edition also examines the highly politicized debates over America's past as well as how school textbooks and popular histories often reinforce rather than correct historical mistakes. A book that explores the truth behind the stories of the making of our nation, National Public Radio's revised edition of *Founding Myths* will be a welcome resource for anyone seeking to separate historical fact from fiction.

Achieving Next Generation Literacy Maureen Connolly, Vicky Giouroukakis, 2016-04-29. As a teacher, what you want most is for your students to learn to immerse themselves in rich and challenging content and leave your classroom better prepared for school and life. In English language arts and humanities, this includes developing the multifaceted reading, writing, thinking, and communication skills that constitute next-generation literacy, including the ability to read complex text independently, develop strong content knowledge through reading, writing, listening, and speaking, tailor communication in response to different audiences, tasks, purposes, and disciplines, comprehend text as well as critique it, value evidence in arguments they read, hear, or develop, use technology strategically and capably, understand perspectives and cultures that differ from their own. But as a teacher, you also know how much is riding on THOSE TESTS: achievement tests from the national assessment consortia, the SAT, and ACT, and independent state assessments. Is it possible to help students succeed on mandated tests without sacrificing your values, your creativity, and their education? Yes, it is possible. This book shows you how. This is not a test prep book. It is not about drill-and-kill practices that narrow learning so that students will pass an exam. Instead, authors Maureen Connolly and Vicky Giouroukakis present a lesson planning approach for the secondary classroom that generates test success as a byproduct of

comprehensive literacy learning After a comparative analysis of how current ELA assessments measure literacy they model a backward design based process for using these test items as a tool to create engaging and effective instruction With 6 sample lessons 42 instructional techniques and tips for differentiation this practical resource will empower you to help the students you love become capable literate individuals who are also well prepared to ace high stakes tests **The Observation Protocol for Academic Literacies** Magaly Lavadenz,Elvira G.
