Walsh, Bruce Kleger, 2013-11-21 The papers assembled in this collection comprise a majority of the oral presentations as well as several poster presentations given at the 22nd Annual Symposium arranged by the Eastern Pennsylvania Branch of the American Society for Microbiology. The symposium would not be possible without the generous support of the many sponsors see sponsor list or without the concerted effort of all the Committee members. This Symposium series has evolved into an annual Eastern Pennsylvania Branch ASM event that attracts participants from a wide geographic area. It should be noted that one of the hallmarks of these symposia involves interaction between the presenters and those in attendance. Several authors have altered their by the participants. Therefore the manuscript that manuscripts based on comments follows should be viewed as a group effort of both the participants and presenters. It provides fundamentals of interpreting lab test results not only for pharmacy students but also for practitioners as an aid in assessing patient drug treatment responses. It is the only text written by and for pharmacists and provides case studies and practical information on patient therapy. Since the publication of the third edition much has changed in the clinical lab and in the hospital pharmacy. Consequently the new fourth edition incorporates significant revisions and a wealth of important new information. NEW TO THIS EDITION Three new chapters including new information on men's health, women's health and pharmacogenomics and laboratory tests. Mini cases embedded in each chapter provide therapy related examples and reinforce important points made in the text. Quickview Charts give an overview of important clinical information including reference ranges and critical values. Learning Points focus on a clinical application of a major concept present in the chapter.
