

Introduction

1.1 Project Acer

Acer is implementing sap in "Project UCB" to have latest and standard version of software to make things flow in standard and fluent manner using SAP suite of applications.

1.2 Implementation Mythology

Project Acer is being implemented using Accelerated SAP (ASAP) methodology. SAP leverages a core set of methodologies and tools designed to deliver rapid, reliable results, and to help our customers get the most from their solutions. These include the ASAP Methodology for Implementation (content the project team follows to implement SAP software efficiently).

The ASAP methodology adheres to a specific road map that addresses the following five general phases:

➤ Project Preparation:

In this step the project team is identified and mobilized, the project standards are defined, and the project work environment is set up.

➤ Business Blueprint:

In this step the business processes are defined and the business blueprint document is designed.

➤ Realization:

In this step the system is configured, knowledge transfer occurs, extensive unit testing is completed, and data mappings and data requirements for migration are defined.

➤ Final Preparation:

In which final integration testing, stress testing, and conversion testing are conducted, and all end users are trained.

➤ Go-Live and Support:

In which the data is migrated from the legacy systems, the new system is activated, and post-implementation support is provided.
