Reimagining Nigeria's Educational System Joseph A. Balogun,2023-09-20 This book assesses the challenges within the Nigerian educational system and provides a concrete plan to revitalize the low performing system by strengthening high stakes testing at all levels In Nigeria many citizens believe that the solution to the country s low performance in education is to eliminate high stakes standardized testing High stakes testing refers to applying standardized student achievement tests as a primary mechanism to evaluate students teachers and their school s performance This book argues that the poor quality of education and low ranking of Nigeria s educational system is not related to the negative consequences of high stakes testing but rather is due to many intrinsic factors By conducting a comparative analysis of six high performing education systems worldwide the book offers a comparative summative evaluation of the educational system and offers recommendations This book will be of interest to policymakers and scholars in the fields of African education higher education quality and global studies African studies management and administration leadership and professional development studies Joseph Abiodun Balogun is former Dean and retired Distinguished University Professor at the College of Health Sciences Chicago State University USA Visiting Professor Program Consultant at the Centre of Excellence in Reproductive Health Innovation University of Benin Nigeria and President CEO Joseph Rehabilitation Center Tinley Park Illinois USA

Pediatric Neurosurgery Board Review Nir Shimony,George Jallo,2023-05-06 This specialized textbook will be dedicated to the various disease topics of pediatric neurosurgery and management strategies The text will cover the different aspects of the field of pediatric neurosurgery in a unique way by giving state of the art up to date synopsis with references to recent publications More specifically the whole

book is dedicated to a comprehensive discussion of brainstem tumors and other lesions. It will be composed of 20 chapters. The various chapters will start from updates regarding the development of the nervous system and the clinical differences in assessing the infant or a child in comparison to the adult patient. The book then will focus on various pathologies starting with hydrocephalus, pediatric brain and spine tumors, congenital malformation, spasticity, epilepsy, and more. The proposed textbook will be enriched with diagnostic and surgical images and illustrations that cover all types of pediatric neurosurgery pathologies with an emphasis on evidence-based data that reflects the controversies and possible solutions. The main structure of each chapter will include a short synopsis of the topic at hand, questions and answers that will inspire the reader for better understanding, learning objectives, and key references for further reading. Written by experts in the field, Pediatric Neurosurgery Board Review serves as a valuable resource for neurosurgery residents and fellows studying for their neurosurgery exams as well as an educational material for neurosurgery specialists after graduation by discussing pediatric neurosurgery in a more convenient way to review and understand key information in this field.

The Skills Balancing Act in Sub-Saharan Africa Omar Arias, David K. Evans, Indhira Santos, 2019-01-31

Despite strong recent economic growth, Sub-Saharan Africa has levels of economic transformation, poverty reduction, and skill development far below those of other regions. Smart investments in developing skills aligned with the policy goals of productivity, growth, inclusion, and adaptability can help to accelerate the region's economic transformation in the 21st century. Sub-Saharan Africa's growing working-age population presents a major opportunity to increase shared prosperity. Countries in the region have invested heavily in building skills; public expenditure on education increased sevenfold over the past 30 years, and more children are in school today than ever before. Yet systems for building skills in this population have fallen short, and these shortcomings significantly impede economic prospects. In half of the countries, fewer than two in every three children complete primary school; even fewer reach and complete higher levels of education. Learning outcomes have been persistently poor, leading to substantial gaps in basic cognitive skills, literacy, and numeracy among children, young people, and adults. The literacy rate of the adult population is below 50 percent in many countries; functional literacy and numeracy rates are even lower. Systemwide change is required to achieve significant progress. Multiple agencies at the central and local levels are involved in skills development strategies, making skills everyone's problem, but no one's responsibility. Policies and reforms need to build capacity for evidence-based policies and create incentives to align the behaviors of all stakeholders with the pursuit of national skills development goals. The Skills Balancing Act in Sub-Saharan Africa: Investing in Skills for Productivity, Inclusivity, and Adaptability lays out evidence to inform the policy choices that countries will make in skill investments. Each chapter addresses a set of specific questions, drawing on original analysis and synthesis of existing studies to explore key areas: How the skills appropriate to each stage of the life cycle are acquired and

whatmarket and institutional failures affect skills formation What systems are needed for individuals to access these skills including familyinvestments private sector institutions schools and other public programs How those systems can be strengthened How the most vulnerable individuals those who fall outside the standard systemsand have missed critical building blocks in skills acquisition can be supported Countries will face trade offs often stark ones that will have distributional impactsand a bearing on their development path Committed leaders reform coalitions and well coordinated policies are essential for taking on the skills balancing act in Sub Saharan Africa
