Related Party Transactions and Corporate Groups Ivan Romashchenko, 2020-03-06 In a market environment where economic actors conduct themselves as diligent and conscientious managers the regulation of related party transactions RPTs would be largely irrelevant Unfortunately the corporate reality is far from an ideal world that is innocent of market abuse and corporate fraud It remains necessary to protect minority shareholders from the wrongdoings of majority shareholders and to protect all shareholders from opportunistic managerial behaviour This timely book the first on the subject since implementation of the European Union s EU s revised Shareholders Rights Directive provides in depth analysis of how and to what extent RPTs are covered by existing legal requirements on capital protection and corporate group regulation highlighting experiences and strategies adopted in Germany Poland and the Netherlands as examples for Eastern European countries and in particular Ukraine Beyond his comparative analysis of the current status the author offers recommendations for more effective handling of RPTs investigating such aspects as the following what constitutes a corporate group and how group issues are regulated in the various legal systems what constitutes a conflict of interest originating in ownership and control and what types of such conflicts occur whether RPTs within corporate groups should receive special treatment relative to transactions outside groups combatting corporate raiding most often carried out through illegal seizure of corporate assets approval and disclosure requirements for RPTs and how information about RPTs is disclosed publicly Drawing on resources including legislation case law scholarship and intensive discussions with practicing lawyers from several jurisdictions the author underscores the imperative of establishing limitations and requirements that oblige a company s officers shareholders and other potential related parties to follow certain rules whenever they wish to enter into an RPT As a contribution to the debate about the convergence between EU corporate law and that of major eastern European states the book has no peers Practitioners in both East and West who advise on compliance with regulations for RPTs or represent stakeholders interests against abusive RPTs will ensure appropriate remedies and protection mechanisms for their clients

Handbook of Research on Building Inclusive Global Knowledge Societies for Sustainable Development Popescu, Cristina Raluca Gh., 2022-06-17 Knowledge and information have significant impacts on

individuals daily lives and activities especially when referring to the new economy and the global knowledge societies. However, the COVID 19 pandemic has caused massive disruptions in the creation of the vital inclusive global information society. Due to this change, further study on the current difficulties and best practices of creating global knowledge societies is required in order to ensure communities can continue to advance and information is shared appropriately. The Handbook of Research on Building Inclusive Global Knowledge Societies for Sustainable Development aims at providing an updated view of the newest trends, novel practices, and latest tendencies concerning building inclusive global knowledge societies for sustainable development while focusing on the benefits and the opportunities derived from the new economy and the global knowledge societies. Covering topics such as smart cities, food security, and climate change, this major reference work is ideal for policymakers, government officials, business owners, managers, academicians, scholars, researchers, practitioners, instructors, and students.

Wearable Sensor Technology for Monitoring Training Load and Health in the Athletic Population Billy Sperlich, Hans-Christer Holmberg, Kamiar Aminian, 2020-02-13. Several internal and external factors have been identified to estimate and control the psychobiological stress of training in order to optimize training responses and to avoid fatigue, overtraining, and other undesirable health effects of an athlete. An increasing number of lightweight sensor-based wearable technologies (wearables) have entered the sports technology market. Non-invasive sensor-based wearable technologies could transmit physical, physiological, and biological data to a computing platform and may provide, through human-machine interaction (smart watch, smartphone, tablet), biofeedback of various parameters for training load management and health. However, in theory, several wearable technologies may assist to control training load, but the assessment of accuracy, reliability, validity, usability, and practical relevance of new upcoming technologies for the management of training load is paramount for optimal adaptation and health.
