**The Markas** Ojaide, Tanure, Mohammed, Razinat, 2019-05-09 This anthology is an outcome of literary writers' reaction to the Boko Haram insurgency in the north eastern part of Nigeria. Lives therein have not only been extensively disrupted by the group's violent tactics and the mind numbing levels of physical destruction and thousands of deaths but also in the dislocation of millions of people with most of them seeking refuge in urban centres especially Maiduguri for safety. These refugees classified as Internally Displaced Persons and in camps guarded by Nigerian soldiers have received worldwide attention. Writers in the affected areas and elsewhere in Nigeria have responded in their poetry, short stories and non-fiction, some of which are collected here.

**Arts & Humanities Citation Index**, 2000 Education and Learning in the Early Islamic World Claude Gilliot, 2017-05-15 Studying education and learning in the formative period of Islam is not immediately easy since the sources for this are relatively late and frequently project backwards to the earlier period, the assumptions and conditions of their own day. The studies in this volume have been selected for the critical approaches and methods of their authors and are arranged under five headings: the pedagogical tradition, scholarship and attestation, orality and literacy, authorship and transmission, and libraries. Together with the editor's introductory essay they present a broad picture of the beginnings and evolution of education and learning in the Islamic world.

Handbook of Research on the Applications of Neutrosophic Sets Theory and Their Extensions in Education Broumi, Said, 2023-06-09 Fuzzy sets have experienced multiple expansions since their conception to enhance their capacity to convey complex information. Intuitionistic fuzzy sets, image fuzzy sets, q-rung orthopair fuzzy sets and neutrosophic sets are a few of these extensions. Researchers and academics have acquired a lot of information about their theories and methods for making decisions. However, only a small number of research findings discuss how neutrosophic sets theory and their extensions, NSTEs, are used in education. The Handbook of Research on the Applications of Neutrosophic Sets Theory and Their Extensions in Education implements fresh scientific approaches to enhance the quality of decisions under neutrosophic environments, particularly within education. Covering key topics such as data modeling, educational technologies, decision making and learning management systems, this major reference work is ideal for instructional designers, researchers, academicians, scholars, practitioners, instructors and students.
