fleeting moment He soon could detail all of the front line aircraft and even identify them by the sound of their passing overhead Growing up in Connecticut he had the opportunity to watch the development of the Sikorsky helicopters and the Chance Vought aircraft albeit from a distance Long bicycle rides to airports in the area merely whetted his appetite further Shortly after graduation from the U S Coast Guard Academy he was selected to attend U S Navy Flight Training at Pensacola and Corpus Christi and then assigned to the Coast Guard Air Station Elizabeth City NC Aloft relates the experiences of a 23 year career in Coast Guard Aviation in many different roles a career that was punctuated by the good the bad and everything in between but never far from where the action was Retiring from the Coast Guard as the Commanding Officer of the Air Station Cape Cod MA he launched his second career in aviation most of it in the new aircraft production or the modification of existing aircraft Aloft provides insights into the transition from military aviation to the industrial world of constant pressures union tension tight schedules and unstable economies Throughout the book the reader will find the thread of aviation and its lore woven through fast moving vignettes

History of Acquisition in the Department of Defense, Volume 1
Elliott V. Converse, 2012-06-12 This volume is a history of the acquisition of major weapon systems by the United States armed forces from 1945 to 1960 the decade and a half that spanned the Truman and Eisenhower administrations following World War II These instruments of warfare aircraft armored vehicles artillery guided missiles naval vessels and supporting electronic systems when combined with nuclear warheads gave the postwar American military unprecedented deterrent and striking power 1 They were also enormously expensive The volume is organized chronologically with individual chapters addressing the roles of OSD the Army Navy and Air Force in two distinct periods The first roughly coinciding with President Truman's tenure covers the years from the end of World War II through the end of the Korean War in 1953 The second spans the two terms of the Eisenhower presidency from 1953 through early 1961 The year 1953 marked a natural breakpoint between the two periods The Korean War had ended President Eisenhower and his defense team began implementing the New Look a policy and strategy based on nuclear weapons which they believed would provide security and make it possible to reduce military spending The New Look's stress on nuclear weapons along with the deployment of the first operational guided missiles and the rapid advances subsequently made in nuclear and missile technology profoundly influenced acquisition in the services throughout the 1950s and the remainder of the century As used in this study the term acquisition encompasses the activities by which the United States obtains weapons and other equipment In surveying the history of acquisition between 1945 and 1960 this study discusses or refers in passing to many of the hundreds of weapon system programs initiated by the services in that period but it is not a weapons encyclopedia Instead it investigates a few major programs in depth in the belief that such detailed examination best reveals the evolution of acquisition policies organizations and processes and the various forces influencing weapons programs
