White,2022-12-27 This book argues that the moral quality of an act comes from the agent s inner states By arguing for the indispensable relevance of intention in the moral evaluation of acts the book moves against a mainstream objective approach in normative ethics It is commonly held that the intentions knowledge and volition of agents are irrelevant to the moral permissibility of their acts This book stresses that the capacities of agency rather than simply the label agent must be engaged during an act if its moral evaluation is to be coherent The author begins with an ontological argument that an act is a motion or a causing of change in something else He argues that the source of an act s moral meaning is in the agent specifically what the agent if aware of relevant facts around her aims to accomplish He then moves to a series of critical chapters that consider arguments for mainstream approaches to act evaluation including Thomson s dismissal of the agent knowledge and volition requirements Scanlon s arguments for a derivative relevance of intentions to permissibility Frowe s causal roles of agents in the moral evaluation of acts and Bennett s explicit defense of the objective approach The book concludes by offering the author s preferred replacement for the objective approach an Aristotelian Thomist view of acts *Acts Intentions and Moral Evaluation* will be of interest to scholars and advanced students working in

The Independent, 1878 *The Concept of Affectivity in Early Modern Philosophy* Ádám Smrcz, Maximilian Kiener, Jan Forsman, Hanna Vandenbussche, Davide Monaco, Filip Buyse, Keith Green, Brian Glenney, Christopher Davidson, Zsolt Bagi, Dávid Bartha, Dan O'Brien, Hans D. Muller, Csaba Olay, 2017-09-01 There is no need to argue for the relevance of affectivity in early modern philosophy When doing research and conceptualizing affectivity in this period we hope to attain a basic interpretive framework for philosophy in general one that is independent of and cutting across such unfruitful divisions as the time honored interpretive distinction between rationalists and empiricists which we consider untenable when applied to 17th century thinkers Our volume consists of papers based on the contributions to the First Budapest Seminar in Early Modern Philosophy held on 14 15 October 2016 at Eötvös Loránd University Budapest When composing this volume our aim was not to present a systematic survey of affectivity in early modern philosophy Rather our more modest goal was to foster collaboration among researchers working in different countries and different traditions Many of the papers published here are already in implicit or explicit dialogue with others We hope that they will generate more of an exchange of ideas in the broader field of early modern scholarship
