Decentralization for Satisfying Basic Needs - 1st Edition J. Michael McGuire, 2005-11-01 Decentralization as a Means of Satisfying Basic Needs An Economic Guide for Policymakers by J Michael McGuire The challenge addressed in this book is designing the degree of decentralization that is most effective in satisfying the basic needs of the poor Case studies of decentralization at work in the real world are presented and analyzed The aim of this book is to help the reader who wishes to use decentralization to help implement a basic needs approach to development The aim of this book is to help readers use the decentralization of government functions to implement a basic needs approach to development The aim is not to give the answer but rather to provide insight into decentralization as a process and to help practitioners develop skills in designing their own decentralization programs

Security and Usability Lorrie Faith Cranor, Simson Garfinkel, 2005-08-25 Human factors and usability issues have traditionally played a limited role in security research and secure systems development Security experts have largely ignored usability issues both because they often failed to recognize the importance of human factors and because they lacked the expertise to address them But there is a growing recognition that today's security problems can be solved only by addressing issues of usability and human factors Increasingly well publicized security breaches are attributed to human errors that might have been prevented through more usable software Indeed the world's future cyber security depends upon the deployment of security technology that can be broadly used by untrained computer users Still many people believe there is an inherent tradeoff between computer security and usability It's true that a computer without passwords is usable but not very secure A computer that makes you authenticate every five minutes with a password and a fresh drop of blood might be very secure but nobody would use it Clearly people need computers and if they can't use one that's secure they'll use one that isn't Unfortunately unsecured systems aren't usable for long either They get hacked compromised and otherwise rendered useless There is increasing agreement that we need to design secure systems that people can actually use but less agreement about how to reach this goal Security Usability is the first book length work describing the current state of the art in this emerging field Edited by security experts Dr Lorrie Faith Cranor and Dr Simson Garfinkel and authored by cutting edge security and human computer interaction HCI researchers world wide this volume is expected to become both a classic reference and an

inspiration for future research Security Usability groups 34 essays into six parts Realigning Usability and Security with careful attention to user centered design principles security and usability can be synergistic Authentication Mechanisms techniques for identifying and authenticating computer users Secure Systems how system software can deliver or destroy a secure user experience Privacy and Anonymity Systems methods for allowing people to control the release of personal information Commercializing Usability The Vendor Perspective specific experiences of security and software vendors e g IBM Microsoft Lotus Firefox and Zone Labs in addressing usability The Classics groundbreaking papers that sparked the field of security and usability This book is expected to start an avalanche of discussion new ideas and further advances in this important field

Reforming Economics and Economics Teaching in the Transition Economies Michael

Watts, William B. Walstad, 2002-01-01 The volume is of greatest interest to those pursuing issues of the implementation of economics education and its impact at an elementary level on economic understanding and attitudes Through generally careful statistical analysis it shows what can be done even in a most difficult environment as well as the constraints on change imposed by Soviet legacies It is a valuable addition to the literature on economics pedagogy Richard E Ericson Slavic Review This comprehensive and impressive volume presents the first book length multi country investigation of reform of economic education in transition economies Authors from the West and from transition economies describe the major changes in economics content and instruction that occurred in schools and universities throughout nations in Eastern and Central Europe and the former Soviet Union from 1989 to 2000

Raising Capital David

E. Vance, 2005-04-20 Most small businesses cite lack of capital is a major constraint on growth Raising Capital focuses on non bank sources of capital since banks only lend to companies that fit a very narrow profile The topics covered include i capital sources entrepreneurs can tap when they are too small or unusual for banks ii angel investors and venture capital iii where to look for angels venture capitalists and other capital sources iv how to pitch your company and close the deal v deal terms and issues that arise when negotiating a deal vi going public through an IPO or little known small public offerings viii asset based lenders and ix other financing vehicles including bond commercial paper PIPEs and securitization The scope of the book ranges from capital for entrepreneurs who have little more than an idea to capital for top rated companies

Climate Change Economics between Europe and China Qing Pei, 2021-11-02 This book is the first attempt to highlight the Great Divergence between Europe and China from the perspective of environmental change The author discusses the agrarian economy while considering the effects of climate change in both Europe and China at a long term scale The findings in the book supplement current knowledge and discussion on the Great Divergence across Eurasia The book further aims to

empirically review the climatic impacts on the human community in the past as the relevant historical reference by which to understand human nature linkages in the current Anthropocene epoch The statistical analysis in the book will contribute to the development of relevant subjects such as environmental humanities quantitative history and historical geography The book thus is suitable to all levels of students undergraduate and postgraduate in the university In summary by combining multiple disciplines in both methods and knowledge this book becomes an interesting reference to students academic staff and even the general public It may also appeal to policymakers who aim to address the impacts of climate change according to past societal experiences *EBOOK: Macroeconomics* Rudiger Dornbusch, Stanley Fischer, Richard Startz, 2014-02-16

Dornbusch Fischer and Startz has been a long standing leading intermediate macroeconomic theory text since its introduction in 1978 This revision retains most of the text s traditional features including a middle of the road approach and very current research while updating and simplifying the exposition A balanced approach explains both the potential and limitations of economic policy Macroeconomics employs a model based approach to macroeconomic analysis and demonstrates how various models are connected with the goal of giving students the capacity to analyze current economic issues in the context of an economic frame of reference The only pre requisite continues to be principles of economics

Encyclopedia of the Developing World Thomas M. Leonard, 2013-10-18 A RUSA 2007 Outstanding Reference Title The Encyclopedia of the Developing World is a comprehensive work on the historical and current status of developing countries Containing more than 750 entries the Encyclopedia encompasses primarily the years since 1945 and defines development broadly addressing not only economics but also civil society and social progress Entries cover the most important theories and measurements of development relate historical events movements and concepts to development both internationally and regionally where applicable examine the contributions of the most important persons and organizations and detail the progress made within geographic regions and by individual countries Real World Micro 15th Edition Daniel

Fireside, Smriti Rao, Bryan Snyder, 2008 **Descentralizacion para Satisfacer Necesidades Basicas** J. Michael McGuire, 2009-03-01 Approximately 25% of Latin Americans live on less than 2 a day and Latin America is the most unequal region of the world Poverty and inequality cause suffering and slow development The solution must include generating an inclusive development process through satisfying the basic needs of the poor that enhance their productivity that enable them to contribute to the development process and that enables them to earn the income necessary to live a full life Decentralization of taxing and spending from the central government to lower levels of government can help to satisfy basic needs of the poor and create an inclusive development process However decentralization is a stepby step process that must implemented by taking into account real world circumstances such as a lack of administrative ability in local government and by formulating policy accordingly The book derives economic principles for implementing the process of decentralization and it presents cases that illustrate the principles at work It is an economic guide for policymakers and practitioners

Reintroducing Macroeconomics Steven Mark Cohn, 2015-01-28 This lively introduction to heterodox economics provides a balanced critique of the standard introductory macroeconomic curriculum. In clear and accessible prose it explains many of the key principles that underlie a variety of alternative theoretical perspectives including institutionalist economics, radical economics, Post Keynesian economics, feminist economics, ecological economics, Marxist economics, social economics, and socioeconomics. Because the book's structure parallels the chapters and subject matter presented in a typical introductory macroeconomics textbook, *Reintroducing Macroeconomics* provides readers with a running commentary on the standard approach while simultaneously introducing them to a broader range of ideas about the causes and appropriate policy responses to a wide range of common economic problems. Although designed primarily as a companion volume for students in introductory economics courses, the book can also be used effectively for more targeted applications that highlight a particular economic issue or approach. It will be of particular interest to students in related disciplines such as American Studies, anthropology, black studies, environmental studies, gender studies, history, political science, and sociology who may be required to take introductory economics classes and who are interested in gaining an alternative perspective. By demonstrating the vitality and common ground underlying a broad spectrum of heterodox approaches, *Reintroducing Macroeconomics* brings alternative perspectives into the classroom in an accessible way that empowers students to think about the economy in new and exciting ways. The text includes end-of-chapter study questions as well as a detailed note to instructors.
