Although this walk through the heart of the city is more “urban” than any of the others in this guide, it is well worth taking. It introduces city residents and visitors alike to Edmonton, past and present. The views from McDougall Hill highlight the challenges of keeping the incredible North Saskatchewan River valley from being filled with mega-roads and concrete structures. This walk can be combined with a visit to Louise McKinney Riverfront Park.

DIRECTIONS FROM THE MUTTART CONSERVATORY PARKING LOT (9626 – 96A STREET)

- Walk north on the multi-use trail over 98 Avenue and through Henrietta Edwards Park.
- Cross the Tawatina Bridge (the span across the river is 200 m) into Louise McKinney Riverfront Park and turn left.
- Walk past the Trans Canada Trail Pavilion and follow the multi-use trail that leads to the riverfront plaza and up to the Edmonton Conference Centre.

- Walk up the wooden steps to the Edmonton Conference Centre. Proceed up the escalators, or use the elevator, and out the door to Jasper Avenue.
- Walk west along Jasper Avenue, past the ANA (Army, Navy, Airforce) Peace Park with its eternal flame, and past the Marriott Courtyard Hotel and the historic Fairmont Hotel Macdonald. Cross the street and turn south on 100 Street, past Telus Centre North on your right to Macdonald Drive. You can enter the Telus Plaza at several locations.

Big Data, Algorithms and Food Safety Salvatore Sapienza,2022-10-20 This book identifies the principles that should be applied when processing Big Data in the context of food safety risk assessments Food safety is a critical goal in the protection of individuals right to health and the flourishing of the food and feed market Big Data is fostering new applications capable of enhancing the accuracy of food safety risk assessments An extraordinary amount of information is analysed to detect the existence or predict the likelihood of future risks also by means of machine learning algorithms Big Data and novel analysis techniques are topics of growing interest for food safety agencies including the European Food Safety Authority EFSA This wealth of information brings with it both opportunities and risks concerning the extraction of meaningful inferences from data However conflicting interests and tensions among the parties involved are hindering efforts to find shared methods for steering the processing of Big Data in a sound transparent and trustworthy way While consumers call for more transparency food business operators tend to be reluctant to share informational assets This has resulted in a considerable lack of trust in the EU food safety system A recent

legislative reform supported by new legal cases aims to restore confidence in the risk analysis system by reshaping the meaning of data ownership in this domain While this regulatory approach is being established breakthrough analytics techniques are encouraging thinking about the next steps in managing food safety data in the age of machine learning The book focuses on two core topics data ownership and data governance by evaluating how the regulatory framework addresses the challenges raised by Big Data and its analysis in an applied significant and overlooked domain To do so it adopts an interdisciplinary approach that considers both the technological advances and the policy tools adopted in the European Union while also assuming an ethical perspective when exploring potential solutions The conclusion puts forward a proposal an ethical blueprint for identifying the principles Security Accountability Fairness Explainability Transparency and Privacy to be observed when processing Big Data for food safety purposes including by means of machine learning Possible implementations are then discussed also in connection with two recent legislative proposals namely the Data Governance Act and the Artificial Intelligence Act
