DiCarlo,2020-06-03 Unlike any other time in history we are inundated with information from many sources of media and depending on one's ideology the results can be fractious Everyone's racing to catch up to what is reliable dependable and true all the while feeling deep emotional attachments to our personal understanding of important issues It has unfortunately become fashionable to claim that what people feel about issues should be taken as seriously as the facts about those issues Emotional attachment to specific viewpoints and the facts about the world are often two completely different things and we need to keep them distinct The skill set of Critical Thinking allows us to better separate facts from feelings and acknowledges that there is value to our beliefs our ideas and our opinions and that some are simply better than others But what makes these objects of the mind and influences of behavior good bad better or worse Luckily much of the hard work has already been done Philosophers mathematicians logicians scientists writers and many others have developed the Critical Thinking tools that require all of us to make such valued distinctions Here DiCarlo has taken six of the most important tools and distilled them into a skill set that is easy to remember and practical to apply in everyday life This skill set provides anyone with the capacity to be mature

diplomatic and fair and to disagree in a civil manner For the majority of us developing such skills will not happen overnight or in a week or a month It is something that is ongoing and requires continuous practice development and use And in today s age of immediacy with information and opinion just a click away there seems to be less and less time in which to practice such skills Perhaps this is one of the reasons so many people are feeling their way through issues rather than thinking critically about them With a better understanding of the tenets of critical thinking though readers will come away from this book with a renewed sense of engagement with thoughts opinions feelings and facts [The Sacred Remains](#) Gary Laderman,1996-01-01 A primary goal of this study is to shed some light on how changing attitudes toward death and the dead in the previous century have led to present day perspectives and practices Page 1 [Resources in Education](#) ,1998
