Young,2014-02-11 This book is a comprehensive analysis of the definitions concepts and recent research on malingering feigning and other response biases in psychological injury forensic disability populations It presents a new model of malingering and related biases and develops a diagnostic system based on it that is applicable to PTSD chronic pain and TBI Included are suggestions for effective practice and future research based on the literature reviews and the new systems which are useful also because they can be used readily by psychiatrists as much as psychologists In Malingering Feigning and Response Style Assessment in Psychiatric Psychological Injury Dr Young ambitiously sets out to articulate and synthesize the polarities involved in the assessment of response styles in psychological disabilities including PTSD pain and TBI He does so thoroughly and very even handedly neither minimizing the degree that outright faking can be found in substantial numbers of examinees nor disregarding the possibility that there can be causes for validity test failure other than malingering He reviews the prior systems for classifying evidence of malingering and proposes his own criteria for feigned PTSD These are conservative and well grounded in the prior literature Finally the book contains dozens of very recent references giving testament to Dr Young s immersion in the personal injury literature as might be expected from his experience as founder and Editor in Chief for Psychological Injury and the Law Reviewer Steve Rubenzer Ph D ABPP Board Certified Forensic Psychologist

Managing Aerospace Projects Jimmy Williams,2017-09-12 Over the next twenty years the role and contributions of successfully managed projects will continue to grow in importance to aerospace organizations especially considering the demands of emerging markets The accompanying challenges will be how to effectively reduce product and process cost where known

incremental and unknown transformational technological innovation is required Managing Aerospace Projects brings together ten seminal SAE technical papers that support the vision of a more holistic and integrated approach to highly complex projects Using the concept of project management levers Dr Jimmy Williams Jr the editor of this title expands on the critical importance of correctly deciding on Organizational strategies Technology and product strategy Global portfolio strategy Project portfolio strategy Sub optimized strategies result in and contribute to a portfolio of misdirected projects and organizational dissatisfaction with project management outcomes unrelated to the actual project management process As an example ensuring the convergence and readiness of technologies that are critical for the design development and assembly of aircraft requires a disciplined and flexible approach for product and technology development Operating in an environment in which customer needs and supplier capabilities are dynamic requires continual focus on a portfolio of projects initiatives and capabilities that result in sustaining competitive advantage and influence Managing Aerospace Projects stresses the positive impact of project classification and the specific handling and leadership knowledge requirements so that these endeavors are indeed successful Some comparisons and lessons from the automotive industry are offered The notion that project management competence and capabilities are embedded in distinct ways of coordinating and combining multiple competencies suggests that failing to recognize the required organizational adaptations could be a major contributor to sub optimized project management outcomes
