Applied Multivariate Analysis Ira H. Bernstein, 2012-12-06 Like most academic authors my views are a joint product of my teaching and my research Needless to say my views reflect the biases that I have acquired One way to articulate the rationale and limitations of my biases is through the preface of a truly great text of a previous era Cooley and Lohnes 1971 p v They draw a distinction between mathematical statisticians whose intellect gave birth to the field of multivariate analysis such as Hotelling Bartlett and Wilks and those who chose to concentrate much of their attention on methods of analyzing data in the sciences and of interpreting the results of statistical analysis and who are more interested in the sciences than in mathematics among other characteristics I find the distinction between individuals who are temperamentally mathematicians whom philosophy students might call Platonists and scientists Aristotelians useful as long as it is not pushed to the point where one assumes mathematicians completely disdain data and scientists are never interested in contributing to the
