 2022     **Advanced Data Mining and Applications** Longbing Cao, Yong Feng, Jiang Zhong, 2010-11-18 With the ever  
 growing power of generating transmitting and collecting huge amounts of data information overload is now an imminent  
 problem to mankind. The overwhelming demand for information processing is not just about a better understanding of data  
 but also a better usage of data in a timely fashion. Data mining or knowledge discovery from databases is proposed to gain  
 insight into aspects of data and to help people make informed sensible and better decisions. At present growing attention has  
 been paid to the study development and application of data mining. As a result there is an urgent need for sophisticated  
 techniques and tools that can handle new fields of data mining e.g. spatial data mining, biomedical data mining and mining on  
 high speed and time variant data streams. The knowledge of data mining should also be expanded to new applications. The 6th  
 International Conference on Advanced Data Mining and Applications ADMA2010  
 aimed to bring together the experts on data mining throughout the world. It provided a leading international forum for the  
 dissemination of original research results in advanced data mining techniques, applications, algorithms, software and systems  
 and different applied disciplines. The conference attracted 361 online submissions from 34 different countries and areas. All full  
 papers were peer reviewed by at least three members of the Program Committee composed of international experts in data  
 mining fields. A total number of 118 papers were accepted for the conference. Amongst them 63 papers were selected as  
 regular papers and 55 papers were selected as short papers     **Popular Science**, 2004-12 Popular Science gives our  
 readers the information and tools to improve their technology and their world. The core belief that Popular Science and our  
 readers share. The future is going to be better and science and technology are the driving forces that will help make it better.
