Building up the inhibitory synapse Enrico Cherubini, Fast inhibitory transmission exerts a powerful control on neuronal excitability and network oscillations thought to be associated with high cognitive functions An alteration of inhibitory signaling is associated with major neurological and psychiatric disorders including epilepsy Once released from presynaptic nerve terminals GABA and glycine cross the synaptic cleft and bind to postsynaptic receptors localized in precise apposition to presynaptic release sites The functional organization of inhibitory synapses consists in a dynamic process which relies on a number of highly specialized proteins that ensure the correct targeting clustering stabilization and subsequent fate of synaptic receptors Among the proteins involved in this task the tubulin binding protein gephyrin plays a crucial role Through its self oligomerization properties this protein forms hexagonal lattices that trap GABAA and glycine receptors and link them to the cytoskeleton By directly interacting with cell adhesion molecules of the neuroligin/neurexin families that connect presynaptic and postsynaptic neurons at synapses gephyrin ensures a backward control of presynaptic signaling In addition changes in clusters size is dynamically regulated by lateral diffusion of neurotransmitter receptors between the synaptic and extrasynaptic compartments and by their interaction with synaptic scaffold proteins The aim of this Research Topic research articles and reviews is to bring together experts on the cellular and molecular mechanisms regulating the appropriate assembly location and function of pre and postsynaptic specializations at inhibitory synapses A particular emphasis will be on the role of receptor trafficking in synaptic stabilization and plasticity

Reconceptualizing the Literacies in Adolescents' Lives Donna E. Alvermann, Kathleen A. Hinchman, David W. Moore, III, David W. Moore, Stephen F. Phelps, Diane R. Waff, 2007-07-10

Reconceptualizing the Literacies in Adolescents' Lives Second Edition focuses on exploring the impact of young people's identity-making practices in mediating their perceptions of themselves as readers and writers in an era of externally mandated reforms. What is different in the Second Edition is its emphasis on the importance of valuing adolescents' perspectives in an era of skyrocketing interest in improving literacy instruction at the middle and high school levels driven by externally mandated reforms and accountability measures. A central concern is the degree to which this new interest takes into account adolescents' personal, social and cultural experiences in relation to literacy learning. In this new edition of Reconceptualizing the Literacies in Adolescents' Lives, students' voices and perspectives are featured front and center in every chapter. Particular attention is given throughout to multiple literacies, especially how information and new communication technologies are changing learning from and with text. Nine of the 15 chapters are new; all other chapters are thoroughly updated. The volume is structured around four main themes: Situating Adolescents' Literacies addressing how young people use favorite texts to perform their identities; how they counter school-based constructions of incompetence; and how they re-construct their literate identities in relation to certain kinds of gendered expectations, pedagogies and cultural resources; Positioning Youth as Readers and Writers stressing the importance of classroom discourse, cultural capital, agency and democratic citizenship in mediating adolescents' literate

identities Mediating Practices in Young People's Literacies looking at issues of language social class race and culture in shaping how adolescents represent themselves and are represented by others and Changing Teachers Teaching Changes capturing the productive ambiguities associated with teaching urban adolescents to read and write in changing times encouraging students to conduct action research on topics that are personally relevant and using enabling constraints as a concept to formulate policies on adolescent literacy instruction Reconceptualizing the Literacies in Adolescents Lives Second Edition is an essential volume for researchers faculty teacher educators and graduate students in the field of adolescent literacy education Southern California Range Complex, 2008 Determinants of Minority Mental Health and Wellness Sana Loue, Martha Sajatovic, 2008-12-19 The United States is experiencing a dramatic shift in demographics with minorities comprising a rapidly growing proportion of the population It is anticipated that this will likely lead to substantial changes in previously established values needs and priorities of the population including health and mental health for individuals families and society at large This volume focuses on determinants of minority mental health and wellness This emphasis necessarily raises the question of just who is a minority and how is minority to be defined The term has been defined in any number of ways Wirth 1945 p 347 offered one of the earliest definitions of minority We may define a minority as a group of people who because of their physical or cultural characteristics are singled out from the others in the society in which they live for differential and unequal treatment and who therefore regard themselves as objects of collective discrimination The existence of a minority in a society implies the existence of a corresponding dominant group enjoying higher social status and greater privileges **Handbook of PTSD, First Edition** Matthew J.
